Notes to the tables

Symbols used in charts and tables

| | |
|---|-------------------|
| A | arithmetic scale |
| L | logarithmic scale |
| E | estimated |
| P | preliminary |
| R | revised |
| N | not available |
| C | corrected |

Owing to the rounding of figures, components may not always add to the totals shown. A horizontal rule in the body of the table indicates either a break in the series or that the earlier figures are available only at a more aggregated level.

Cansim—Databank identification numbers

Many of the time series published in the Review are available from Statistics Canada in machine-readable form, for use on computers, or in print-outs. Each time series of annual, quarterly, monthly or weekly data on the Cansim system (Canadian Socio-Economic Information Management) has an identification number. Series maintained by Statistics Canada have D or L prefixes (e.g. D1432), those maintained by the Bank of Canada have a B prefix (e.g. B318) and those maintained by Canada Mortgage and Housing Corporation have a H prefix (e.g. H48). The identification number is given as a reference at the top of each column of data and refers to the series of weekly, monthly or quarterly data in that column. Where the frequency of a series as it is available on Cansim is different from that shown in the table or where a combination of quarterly and monthly data is shown in the table, the frequency of the Cansim series is indicated by a superscript M if monthly or by a superscript Q if quarterly. Current and revised data are entered into Cansim immediately on release.

Weekly series

The tables in the Review do not cover a full year of weekly data. For all Wednesday series, in the event a holiday falls on a Wednesday, data for the preceding business day will be shown. Figures for weekly series for which the Bank of Canada is the source are available on request to the Department of Monetary and Financial Analysis, Bank of Canada, Ottawa K1A 0G9.

Notes to the tables

The reference notes to the statistical tables in the Review, which prior to 1981 were included in each monthly issue, are now printed under a separate cover. The separate section of notes will be updated and reprinted at approximately yearly intervals. Additional copies of the explanatory notes may be obtained by writing to the Bank of Canada Review, Public Information Division, Secretary's Department, Bank of Canada, Ottawa K1A 0G9.

This section of the monthly Review will include only revisions to the notes as may be required to keep them current for users of the statistical tables, as well as the reference notes pertaining to tables that are published only occasionally in the Review.

Notes relatives aux tableaux

Abréviations utilisées dans les graphiques et les tableaux

| | |
|---|--------------------------|
| A | Échelle arithmétique |
| L | Ordonnées logarithmiques |
| E | Estimations |
| P | Chiffres provisoires |
| R | Chiffres révisés |
| N | Chiffres non disponibles |
| C | Chiffres corrigés |

Du fait que les chiffres sont arrondis, l'addition des éléments d'un tableau ne correspond pas toujours exactement au total indiqué. Une ligne horizontale dans le corps d'un tableau indique soit qu'il y a une rupture dans une série, soit que les données des périodes antérieures ne sont disponibles que sous une forme plus agrégée.

Cansim — Numéros de référence des séries de Databank

Nombre des séries chronologiques publiées dans la Revue peuvent être obtenues de Statistique Canada sous une forme directement exploitable par ordinateur ou sous la forme d'imprimés. Elles font partie intégrante du fichier Cansim¹, dont chaque série chronologique — annuelle, trimestrielle, mensuelle ou hebdomadaire — est identifiée par un numéro de référence. Les numéros des séries élaborées par Statistique Canada sont précédés de la lettre «D» ou «L» (par exemple : D1432), ceux des séries de la Banque du Canada, de la lettre «B» (par exemple : B318), et ceux de la Société canadienne d'hypothèques et de logement, de la lettre «H» (par exemple : H48). Dans nos tableaux, le numéro apparaît en tête de la colonne et identifie la série hebdomadaire, mensuelle ou trimestrielle qui figure dans la colonne; dans les cas où les fréquences de données figurant au fichier Cansim et dans un tableau de la Revue diffèrent ou lorsque le tableau comporte à la fois une série mensuelle et une série trimestrielle, la fréquence de la série Cansim est indiquée par la lettre «M» si la série est mensuelle et par la lettre «Q» si elle est trimestrielle.

¹ Ce sigle est une abréviation de *Canadian Socio-Economic Information Management System* — Système canadien de traitement des données socio-économiques.

Séries hebdomadaires

Dans les tableaux de la Revue, les séries de données hebdomadaires ne couvrent pas une année entière. Lorsque le mercredi est un jour férié, les statistiques du mercredi sont établies à partir des données du jour ouvrable précédent. On pourra obtenir les données provenant de la Banque du Canada en s'adressant au département des Études monétaires et financières, Banque du Canada, Ottawa K1A 0G9.

Notes relatives aux tableaux

Les notes relatives aux tableaux de la Revue, qui jusqu'à la fin de 1981 étaient reproduites dans chaque livraison, sont désormais imprimées séparément. Les éditions ultérieures seront mises à jour et publiées environ une fois par année. Ceux qui désirent recevoir d'autres exemplaires des notes sont priés de s'adresser à la Revue de la Banque du Canada, Section de l'information, Secrétariat, Banque du Canada, Ottawa K1A 0G9.

La présente section de la Revue ne contiendra que les mises à jour essentielles à l'interprétation des statistiques et les notes se rapportent aux tableaux publiés à des fréquences variables dans la Revue.

D2—D3

Source: Bank of Canada, Statistics Canada

Data on Table D2 are derived from total trust and mortgage loan company data collected quarterly by Statistics Canada (available in "Financial Institutions", Catalogue 61-006) and from a monthly survey by the Bank of Canada covering companies that at the end of 1984 represented over 80 per cent of total assets in these industries. For months between quarter-ends, items on Table D2 are estimated individually from this survey to arrive at representative industry-wide figures. As a result, total assets and liabilities for the intra-quarter months may not be equal as they are the sums of the component series. Where there are foreign currency assets or liabilities these are included in the relevant component series. Data for the chartered bank mortgage loan subsidiaries appearing on Table D3 originate directly from the monthly survey by the Bank of Canada.

• *Cash and demand deposits* include deposits placed in chartered banks and other financial institutions in Canada and outside Canada. • *Other term and notice deposits* include swapped deposits at chartered banks and deposits in institutions other than chartered banks. • *Short-term paper and bankers' acceptances* are bonds, debentures and notes with an original term to maturity of one year or more. • *Personal loans* comprise both secured and unsecured loans. • *Collateral business loans* include secured loans placed with investment dealers as well as other collateral loans, and include farm loans. • *Other assets* comprise other investments in Canada as well as investments in institutions and corporations outside Canada, accounts receivable and accrued revenue, fixed assets, real estate and other assets. • *Total major assets* include cash and demand deposits, treasury bills, term and notice deposits, short-term paper and collateral loans placed with investment dealers plus Canadian bonds, mortgage loans and sales agreements, personal loans, and Canadian preferred and common shares. Prior to January 1984 foreign securities were also included; after that date, these securities are included in other assets.

Daily interest deposits include only those deposits held by companies surveyed by the Bank of Canada. • *Tax-exempt deposits* include RRSPs, RHSPs and other tax-sheltered funds placed in savings or term deposits. • *Other promissory notes* include promissory notes with an original term to maturity of one year or more, subordinated notes and other notes.

• *Total major liabilities* comprise total deposits, bank loans, debentures issued under trust indentures, and promissory notes. • *Other liabilities* are debt owing to parent, subsidiary and affiliated companies, accounts payable and accrued liabilities, corporation income taxes payable, deferred income, mortgages payable, deferred income taxes and other liabilities.

H12

Source: Statistics Canada

Data are obtained from the Statistics Canada publication "The Consumer Price Index", Catalogue 62-001. Beginning in January 1985 the weights used in constructing the index are based on 1982 consumer expenditure patterns, replacing the 1978 weights used from April 1982. Two earlier reweightings occurred in October 1978 incorporating 1974 consumer expenditure patterns and May 1973 using 1967 weights. In February 1983, with the release of the January 1983 consumer price index, the time base was changed in a purely arithmetic operation from 1971 to 1981=100. Further information on these revisions, as well as on the concepts and methodology, may be obtained from Statistics Canada publications.

The percentage changes shown in Column 15 of Table A1 are the rates published by Statistics Canada in Catalogue 62-001.

D2 et D3

Source : Banque du Canada, Statistique Canada

Les données qui figurent au tableau D2 sont tirées des données de l'ensemble du secteur des sociétés de fiducie ou de prêt hypothécaire, recueillies tous les trimestres par Statistique Canada (publiées dans «Institutions financières», no de catalogue 61-006) et d'une enquête mensuelle menée par la Banque du Canada auprès d'un échantillon de sociétés de fiducie ou de prêt hypothécaire qui représente plus de 80 % de l'actif de ce secteur. Pour ce qui est des mois qui ne coïncident pas avec une fin de trimestre, les chiffres des postes figurant au tableau D2 sont obtenus par estimation cas par cas à partir des données de l'enquête mensuelle, pour en arriver à des chiffres représentatifs du secteur. En conséquence, l'ensemble de l'actif pour les mois qui ne coïncident pas avec une fin de trimestre peut ne pas être égal à l'ensemble du passif correspondant, puisque chacun de ces totaux résulte de l'addition des chiffres de chacun des éléments de la série visée. Les avoirs et engagements en monnaies étrangères sont inclus le cas échéant dans chacune des séries correspondantes. Les données qui figurent au tableau D3 sur les filiales hypothécaires des banques à charte sont tirées directement de l'enquête mensuelle de la Banque du Canada.

• *L'encaisse et les dépôts à vue* comprennent les dépôts confiés aux banques à charte et aux autres institutions financières au Canada et à l'étranger. • *Les autres dépôts à terme ou à préavis* comprennent les dépôts swaps dans les banques à charte et les dépôts dans les institutions autres que les banques à charte. • Le poste *Papier à court terme et acceptations bancaires* comprend les obligations, les débentures et les billets, à échéance d'un an ou plus. • *Les prêts personnels* comprennent les prêts garantis ou non garantis. • *Les prêts sur nantissement commerciaux* comprennent les prêts garantis accordés aux courtiers en valeurs mobilières de même que les autres prêts sur nantissement; ils comprennent également les prêts agricoles. • *Les autres éléments de l'actif* comprennent les autres placements au Canada et les placements dans les institutions et les sociétés constituées à l'étranger, les comptes-clients, les produits constatés par régularisation, les immobilisations, les immeubles ou biens réels et autres avoirs. • Le poste *Ensemble des principaux avoirs* comprend l'encaisse et les dépôts à vue, les bons du Trésor, les dépôts à terme ou à préavis, le papier à court terme et les prêts sur nantissement accordés aux courtiers en valeurs mobilières, ainsi que les obligations canadiennes, les prêts hypothécaires et les contrats de vente, les prêts personnels et les actions canadiennes privilégiées ou ordinaires. Avant le mois de janvier 1984, ce poste comprenait les titres étrangers. Depuis cette date, les titres étrangers figurent dans la rubrique «Autres éléments de l'actif».

• Le poste *Dépôts à intérêt quotidien* ne comprend que les dépôts détenus par les sociétés comprises dans l'enquête de la Banque du Canada. • *Les dépôts exempts d'impôts* comprennent les REER, les REEL et les autres fonds non imposables placés sous forme de dépôts d'épargne, de dépôts à vue ou de dépôts à terme. • *Les autres billets à ordre* comprennent les billets à ordre à échéance d'un an ou plus, les billets subordonnés et autres billets. • *L'ensemble des principaux engagements* comprend l'ensemble des dépôts, des prêts bancaires, des débentures émises en vertu de contrats de fiducie et des billets à ordre. • *Les autres éléments du passif* comprennent les sommes dues aux sociétés mères, aux filiales et aux sociétés affiliées, les comptes-fournisseurs et les charges à payer, les impôts à payer sur le revenu des sociétés, les revenus différés, les emprunts hypothécaires, les impôts sur le revenu différés et les autres engagements.

Source : Statistique Canada

Les données proviennent de la publication de Statistique Canada intitulée «L'indice des prix à la consommation» (nj60 62-001 au catalogue). À compter de janvier 1985, les pondérations qui servent au calcul de l'indice sont fondées sur la structure des dépenses de 1982 et remplacent les pondérations de 1978, qui sont utilisées depuis avril 1982. Les pondérations avaient été révisées à deux reprises auparavant, soit en octobre 1978 pour tenir compte de la structure des dépenses de 1974, et en mai 1973 pour tenir compte de la structure des dépenses de 1967. En février 1983, après publication des données de l'indice des prix à la consommation pour janvier 1983, l'ancienne année de base, soit 1971, a été remplacée par 1981; les opérations effectuées ont été purement arithmétiques. On trouvera dans les publications de Statistique Canada de plus amples renseignements sur ces révisions ainsi que sur les concepts et la méthodologie utilisés.

Les taux de variation reproduits à la colonne 15 du Tableau A1 sont extraits de la publication n° 62-001 de Statistique Canada.

Total Bank of Canada note liabilities include notes issued by chartered banks, Dominion of Canada, provinces and defunct banks. These are note issues that are in the process of being retired, and liability for them has been taken over by the Bank of Canada from the original issuers.

K2–K3

Source: Inspector General of Banks

Since 1965 all chartered banks have ended their years on 31 October. The consolidated statements of revenue and expense and of shareholders' equity and appropriations for contingencies are based on the format prescribed in Schedules L, M and N of the 1980 Bank Act. The operations of all majority-owned subsidiaries are fully consolidated into income with the minority interest shown separately. Where a bank holds at least 20 per cent but not more than 50 per cent of a company's voting shares, the bank takes into its income an amount equivalent to its share of that company's earnings. The last tables showing data on an unconsolidated basis were published in the March 1982 Review.

- *Provisions for loan losses* are based on a five-year average of actual loan loss experience.
- *Other income* includes gains and losses on holdings of shares and securities. Net gains or losses on debt securities with a fixed maturity are amortized on a straight-line basis over five years.
- *Appropriations for contingencies* include tax allowable and tax paid appropriations.

K4

Sources: Government of Canada Public Accounts, public accounts of provincial governments

The *Post Office Savings Bank* discontinued accepting deposits as at 3 September 1968. Since 1969 term deposit receipts at *Alberta Treasury Branches* have been included with *public deposits bearing interest*.

K7

These tables are intended to provide users with historical data on the various monetary aggregates and credit measures. The monetary aggregate M1 may be obtained by adding together the figures for currency outside banks and privately held demand deposits (less private sector float). These two components are seasonally adjusted separately. For the most current data, users are referred to the regular Table E1 and, for further details and definitions, to the notes applicable to Table E1.

K1

Source: Banque du Canada

Le passif-billets de la Banque du Canada comprend, outre ses propres billets, les billets émis par les banques à charte, par le Dominion du Canada, par les provinces et par certaines banques disparues depuis. Ces billets sont retirés de la circulation à mesure qu'ils sont présentés. La responsabilité de leur rachat a été transférée des émetteurs à la Banque du Canada.

K2 et K3

Source: Inspecteur général des banques

Depuis 1965, toutes les banques à charte clôturent leurs exercices financiers le 31 octobre. Les états consolidés des revenus et dépenses, ceux de l'avoir propre des actionnaires et des provisions pour éventualités sont présentés selon les modèles des Annexes L, M et N de la Loi sur les banques de 1980. Les opérations de toutes les filiales dans lesquelles les banques détiennent une participation majoritaire sont consolidées intégralement, mais lorsque cette participation est minoritaire, les chiffres sont présentés séparément. Lorsqu'une banque possède au moins 20 % mais pas plus de 50 % des actions donnant droit de vote dans une société, elle ajoute à ses revenus un montant équivalant à sa part des bénéfices de cette société. Les derniers tableaux contenant des données non consolidées ont été publiés dans la Revue de mars 1982.

- Les *provisions pour pertes sur prêts* sont basées sur des moyennes des pertes effectives enregistrées sur des périodes de cinq ans.
- Les *autres revenus* comprennent les profits et pertes provenant des portefeuilles d'actions et de titres de créance. Les montants nets des profits et pertes sur des titres de créance à échéance fixe font l'objet d'un amortissement linéaire échelonné sur cinq ans.
- Les *provisions pour éventualités* comprennent les provisions imposables et les provisions libérées d'impôt.

K4

Sources: Comptes publics du gouvernement canadien, comptes publics des gouvernements provinciaux

La *Caisse d'épargne postale* n'accepte plus de dépôts depuis le 3 septembre 1968. Depuis 1969, les certificats de dépôts à terme de *succursales du Trésor de l'Alberta* figurent à la rubrique des *dépôts du public productifs d'intérêt*.

K7

Source: Banque du Canada

Ces tableaux visent à fournir aux lecteurs les données rétrospectives concernant les divers agrégats monétaires et mesures du crédit. L'agrégat monétaire M1 s'obtient en additionnant les chiffres se rapportant à la monnaie hors banques à ceux des dépôts à vue détenus par le public (moins les effets du secteur privé en cours de compensation). Ces deux composantes sont désaisonnalisées séparément. Les lecteurs consulteront le Tableau E1 de la Revue pour les données les plus récentes et les notes relatives au Tableau E1 pour les définitions et des renseignements plus complets.

Publié en février 1985

Les rapports techniques sont publiés seulement dans la langue utilisée par les auteurs; ils sont cependant précédés d'un résumé bilingue. On peut obtenir gratuitement un exemplaire de ces publications en s'adressant à la Section de l'information, Secrétariat, Banque du Canada, Ottawa K1A 0G9. Pour obtenir la liste des travaux de recherche et des rapports techniques publiés avant 1976, veuillez consulter le numéro de décembre 1982 de la Revue.

Rapports techniques

- 5 The equations of RDX2 revised and estimated to 4Q72 (1976)
- 6 Sectoral analysis of RDX2 estimated to 4Q72 (1977)
- 7 The comparative ex post forecasting properties of several Canadian quarterly econometric models (1977)
W. Paul Jenkins et Lloyd R. Kenward
- 8 Models of inflation: A taxonomy of effects (1977)
Charles Freedman
- 9 The role of U.S. interests rates in Canadian interest-rate equations: An exploratory analysis (1977)
Charles Freedman, David Longworth et Paul Masson

- 10 Research into the extension of the life of bank notes: Results of 1973, 1975 and 1976 field trials (1977)
A.H. Gillieson
- 11 A neo-Keynesian model of nominal wage determination in Canada (1978)
Benjamin W. Wurzburger
- 12 Economic stabilization and the money supply (1978)
Pierre Duguay and Paul Jenkins
- 13 An analysis of the major dynamic properties of RDX2 (1978)
L. de Bever, U. Kohli and T. Maxwell
- 14 An examination of the small-open-economy hypothesis for Canadian exports (1978)
Benjamin W. Wurzburger
- 15 Une analyse du modèle à forme réduite et son application au Canada (1979)
Pierre Duguay
- 16 Monetary base and money stock in Canada (1979)
Kevin Clinton and Kevin Lynch
- 17 The Canadian newsprint industry: Econometric models of different market structures (1979)
Gordon P. Schaefer
- 18 Simulation analysis of a model based on the life-cycle hypothesis (1980)
Jean-Pierre Aubry and Diane Fleurent
- 19 The process of wage determination: A survey of some recent work (1979)
Daryl L. Merrett
- 20 Some aspects of the Canadian experience with flexible exchange rates in the 1970s (1980)
Charles Freedman and David Longworth
- 21 Two Canadian investment outlook surveys: An overview and a review (1980)
Brian O'Reilly
- 22 Building a small macro-model for simulation: Some issues (1980)
Paul R. Masson, David E. Rose and Jack G. Selody
- 23 The productivity-inflation nexus in Canada 1963–1979 (1981)
J. Peter Jarrett and Jack G. Selody
- 24 Economic projections and econometric modelling: Recent developments at the Bank of Canada (1981)
Heather Robertson and Michael McDougall
- 25 The equations of RDXF, September 1980 version (1982)
Heather Robertson and Michael McDougall
- 26 The structure and dynamics of RDXF, September 1980 version (1982)
Heather Robertson and Michael McDougall
- 27 Monetary aggregates as targets: Some theoretical aspects (1981)
Charles Freedman
- 28 A comparison of alternative methods of monetary aggregation: Some preliminary evidence (1981)
Jon P. Cockerline and John D. Murray
- 29 Investment: A survey of models with some implications for the effects of monetary policy (1981)
Francis Scotland
- 30 The leading indicator properties of surveyed consumer attitudes and buying intentions (1982)
Bruce Rayfuse
- 10 Research into the extension of the life of bank notes: Results of 1973, 1975 and 1976 field trials (1977)
A.H. Gillieson
- 11 A neo-Keynesian model of nominal wage determination in Canada (1978)
Benjamin W. Wurzburger
- 12 Economic stabilization and the money supply (1978)
Pierre Duguay et Paul Jenkins
- 13 An analysis of the major dynamic properties of RDX2 (1978)

Cover:

United States: Five-dollar gold coin

This month's cover features the reverse of a U.S. five-dollar gold piece of the type issued between 1908 and 1929. The design of this coin is a complete departure from all previous U.S. coin types in that there are no raised portions; both design and legend are incuse (sunken).

The suggestion for the incuse design came from Dr. William Sturgis Bigelow, a friend of President Theodore Roosevelt. Bigelow engaged a Boston sculptor named Bela Lyon Pratt to produce the model for the coin. Roosevelt was pleased with the designs, and the 5-dollar and similar 2½-dollar gold coins were struck and entered circulation late in 1908. However, the new coins generated a great deal of unfavourable public comment. Many prominent people complained that the pieces lacked beauty, that they could be easily counterfeited, that they would not stack properly, and even that they would be unhygienic because the below-surface areas would collect dirt. S.H. Chapman, a prominent numismatist, wrote to the U.S. president claiming that the motif resembled the golden eagle rather than the white-headed or bald eagle. He further asserted that the Indian chief on the obverse side looked emaciated and he also iterated the same general complaints about the design.

Despite the continuing controversy about the design, the coins continued to be issued until 1929 when the United States stopped minting 2½- and 5-dollar gold pieces. The 5-dollar coin, roughly the size of a Canadian 5-cent piece, is composed of 90 per cent gold and 10 per cent copper. It forms part of the National Currency Collection, Bank of Canada. Photograph by James Zagon, Ottawa.

Couverture :

États-Unis : Pièce de cinq dollars en or

L'illustration reproduite en couverture est le revers d'une pièce d'or américaine de cinq dollars émise entre 1908 et 1929. La conception des pièces de toute la série frappée à cette époque diffère complètement de celle des pièces américaines produites jusque-là; en effet, la légende et le dessin des pièces de cette série n'étaient pas gravés en relief, mais en creux.

C'est à une suggestion d'un ami du président Théodore Roosevelt, M. William Sturgis Bigelow, que l'on doit cette série de pièces incuses. Bigelow demanda à un sculpteur de Boston, du nom de Bela Lyon Pratt, de produire le modèle de la pièce. Satisfait du dessin, Roosevelt fit frapper des pièces de cinq dollars et des pièces similaires de deux dollars et demi, qui furent mises en circulation à la fin de 1908. Les pièces furent mal acceptées du public. De nombreuses personnalités haut placées se plaignirent du manque d'esthétique de ces pièces, de la facilité avec laquelle elles pouvaient être contrefaites, des difficultés qu'on avait à les empiler et enfin des problèmes d'hygiène qu'elles posaient, car la poussière s'accumulait dans les parties en creux. Le numismate de renom S.H. Chapman alla même jusqu'à écrire au président pour lui faire remarquer que l'aigle représenté ressemblait plus à un aigle doré qu'à un aigle à tête blanche. En plus de reprendre à son compte les plaintes déjà formulées, il affirmait également que le visage du chef indien, qui orne l'avvers, semblait décharné.

En dépit de cette controverse, les États-Unis continuèrent d'émettre les pièces incuses de deux dollars et demi et de cinq dollars jusqu'en 1929. Celle de cinq dollars est à peu près de la dimension d'une pièce canadienne de cinq cents; elle est faite d'un alliage comportant 90 % d'or et 10 % de cuivre. Elle fait partie de la Collection nationale de monnaies, Banque du Canada. Photographie : James Zagon, Ottawa.

Record of press releases

Major press statements issued by the Bank of Canada and selected other official releases of related interest are published below.

Bank of Canada

21 February 1985

The Bank of Canada announced today that work will begin shortly on the preparation of the site for the construction of a new eleven storey, 200,000 square feet, office building on the northwest corner of Kent and Sparks Streets. The building site has been leased from St. Andrew's Church and the Crown for 75 years.

As indicated in our press release of 24 February 1984 the original project design was acquired from two developers who had planned it in conjunction with the Church. The Bank's involvement arises from its need for space adjacent to its Head Office building to accommodate the growing workload associated with servicing the public debt, managing the note issue and other banking operations. A tunnel under Kent Street will link the new building to the Bank's present building.

It is expected that initially the Bank will occupy only part of the building. Except for 7,000 square feet provided to St. Andrew's Church under the terms of the property lease, the Bank will rent the remaining space to others at commercial rates as it does in the other buildings it owns.

Construction is expected to begin in the spring. Details of the physical structure and an estimate of the final costs will be made available when a construction contract has been awarded.

Bank of Canada

28 February 1985

The average rate for successful bids for 3-month treasury bills at the auction today was 11.27 per cent. The Bank Rate is now 11.52 per cent. Over the last five weeks these rates have risen by 1.86 percentage points.

In the same period the value of the Canadian dollar in terms of the U.S. dollar has declined from 75.52 cents to 72.31 cents, a depreciation of 4.3 per cent. (It reached a low of 71.15 cents earlier this week.) In terms of a trade-weighted index of the currencies of major industrial countries the depreciation has been 3.5 per cent.

The pressure on our financial markets has come from external developments, namely a rise in U.S. interest rates and an extraordinary surge in the value of the U.S. dollar vis-à-vis other currencies. In this situation, the objective of the Bank of Canada has been to mitigate the severity of the impact of these developments on our markets. To attempt to avoid any decline in the exchange rate in this period

Communiqués reproduits à titre documentaire

On trouvera sous cette rubrique certains communiqués importants publiés par la Banque du Canada ou par d'autres organismes officiels.

Banque du Canada

le 21 février 1985

La Banque du Canada a annoncé aujourd'hui que les travaux de préparation du terrain en vue de la construction d'un nouvel immeuble à bureaux de onze étages, d'une superficie de 200 000 pieds carrés, commenceront bientôt à l'angle nord-ouest des rues Kent et Sparks. L'emplacement a été loué de l'Église St. Andrew's et de la Couronne pour une durée de 75 ans.

Comme elle l'indiquait dans son communiqué publié le 24 février 1984, la Banque a acquis les droits relatifs au projet original de deux entrepreneurs qui avaient planifié la mise en valeur de l'emplacement de concert avec l'Église. La Banque a décidé de s'engager dans ce projet parce qu'elle a besoin de locaux attenants au complexe du Siège afin de pouvoir faire face à l'accroissement de la charge de travail liée à la gestion de la dette publique, à l'émission de billets de banque et à d'autres opérations bancaires. Un tunnel sous la rue Kent reliera le nouvel immeuble au complexe existant.

Dans un premier temps, la Banque ne prévoit occuper qu'une partie de l'immeuble; elle mettra une surface de 7 000 pieds carrés à la disposition de l'Église St. Andrew's en vertu du bail et louera le reste aux tarifs pratiqués sur le marché, comme elle le fait pour les autres immeubles qui lui appartiennent.

Les travaux de construction devraient débuter au printemps. Les précisions au sujet de la structure de l'immeuble et l'estimation du coût final des travaux seront fournies lorsque le contrat de construction aura été accordé.

Banque du Canada

le 28 février 1985

Le taux de rendement moyen qui ressort de l'adjudication hebdomadaire des bons du Trésor à 3 mois effectuée aujourd'hui est de 11,27 %. Le taux officiel d'escompte se situe donc maintenant à 11,52 %. Au cours des cinq dernières semaines, ces taux ont augmenté de 1,86 point de pourcentage.

Durant la même période, le cours du dollar canadien par rapport au dollar américain est passé de 0,7552 à 0,7231 cent, ce qui représente une dépréciation de 4,3 %. (Le cours le plus bas atteint cette semaine a été de 0,7115 cent.) La dépréciation se chiffre à 3,5 % lorsqu'elle est calculée à l'aide d'un indice des cours des monnaies des principaux pays industriels pondéré sur la base du commerce extérieur.

La pression exercée sur nos marchés financiers est due à des causes externes, à savoir la hausse des taux d'intérêt aux États-Unis et la poussée extraordinaire du dollar américain par rapport aux autres monnaies. Dans cette situation, la Banque du Canada s'est fixé comme objectif d'atténuer l'impact de ces événements sur nos marchés. Toute tentative pour éviter une baisse quelconque du

would have required very much higher interest rates. To attempt to suppress any rise in interest rates would have led to an intolerable fall in the Canadian dollar.

The degree to which the Bank's operations can influence the impact of external developments on the exchange market and the money market is limited by the interaction between these two markets.

Investors in Canadian dollar financial instruments who are concerned about exchange rate depreciation seek compensation in the form of higher Canadian interest rates. This interaction between the exchange market and the money market was illustrated very clearly in recent weekly treasury bill auctions. As the Canadian dollar declined, the rates at which market participants were prepared to bid for bills at those auctions moved well above the average yield for the previous week and sometimes even well above the market levels during the previous few days.

Department of Finance

6 March 1985

The Honourable Michael Wilson, Minister of Finance, announced today that the Government of Canada has made arrangements to raise funds in the Eurobond market.

The public financing, in the amount of U.S.\$500 million, is being offered to investors today. It consists of a single maturity with a term of five years. The notes bear annual interest coupons of 11 1/2 per cent and have been priced at par. The notes are non-callable until maturity on March 22, 1990.

The offering is being placed through an international syndicate of banks and investment dealers headed by Deutsche Bank AG, Credit Suisse First Boston Limited, Orion Royal Bank Limited and Wood Gundy Limited.

In making this announcement, Mr. Wilson noted that part of the proceeds from the new financing will be used to replace funds being applied towards the redemption of a Swiss franc 500 million note issue (about U.S.\$170 million) maturing on March 14, 1985. This financing was originally arranged by the Government of Canada in 1979. The balance of the proceeds from the new financing will be added to Canada's official holdings of international reserves.

taux de change durant cette période aurait exigé des taux d'intérêt beaucoup plus élevés. Par contre, toute tentative pour empêcher une hausse quelconque des taux d'intérêt aurait entraîné une chute intolérable du dollar canadien.

La mesure dans laquelle les opérations de la Banque peuvent influencer l'incidence que des événements survenus à l'étranger ont sur le marché des changes et le marché monétaire est limitée par l'interaction réciproque entre ces deux marchés. Les investisseurs qui détiennent des avoirs financiers libellés en dollars canadiens et qui sont préoccupés par la dépréciation du dollar canadien cherchent une compensation sous la forme de taux d'intérêt canadiens plus élevés. Les résultats des adjudications hebdomadaires de bons du Trésor tenues durant les dernières semaines illustrent très clairement cette interaction entre le marché des changes et le marché monétaire. À mesure que baissait le cours du dollar canadien, les taux auxquels les participants au marché étaient prêts à acheter des bons du Trésor au cours des adjudications ont augmenté pour se situer bien au-dessus du taux de rendement moyen de la semaine précédente et même parfois bien au-dessus des niveaux atteints sur le marché quelques jours plus tôt.

Ministère des Finances

le 6 mars 1985

Le ministre des Finances, l'honorable Michael Wilson, a annoncé aujourd'hui que le gouvernement du Canada avait arrangé un emprunt sur le marché euro-obligataire.

Le financement public, au montant de É.-U.\$500 millions, est offert aux investisseurs à compter d'aujourd'hui. Il est sous forme d'échéance simple comportant un terme de cinq ans. Les billets portent des coupons d'intérêt annuel de 11 1/2 pour cent et le prix a été fixé au pair. Les billets sont non remboursables par anticipation jusqu'à leur échéance le 22 mars 1990.

L'offre est placée par l'entremise d'un consortium de banques et de courtiers en valeurs mobilières dirigé par la Deutsche Bank AG, Crédit Suisse First Boston Limitée, Banque Royale Orion Limitée et Wood Gundy Limitée.

En faisant cette annonce, M. Wilson a précisé qu'une partie du produit de cet emprunt nouveau servira au remplacement de fonds destinés au remboursement d'une émission de billets au montant de 500 millions de francs suisses (environ É.-U.\$170 millions) échéant le 14 mars 1985. Cet emprunt avait été arrangé par le Canada en 1979. La balance du produit de cette offre nouvelle sera ajoutée à l'encours des réserves officielles de liquidités internationales du Canada.

*Data for consumer credit balances are now shown on an average-of-month-ends basis where applicable.

*À partir de maintenant, les données de l'encours du crédit à la consommation sont des moyennes de fins de mois lorsqu'il y a lieu.

Special features of a number of issues are as follows:

- (a) Subject to partial redemption at par for the sinking fund on each interest payment date, commencing with 15 April 1965. The earliest call date is 15 October 1977.
- (b) This item represents the cancellation of securities held by purchase funds.
- (c) The earliest call date is 1 June 1978.
- (d) Callable after 15 September 1996.
- (e) On 18 March 1975 the Government of Canada announced that the 3% perpetual bonds will be redeemed at par on 15 September 1996.
- (g) Callable after 1 October 1984.
- (h) Callable after 1 April 1988.
- (i) Callable after 15 October 1988.
- (j) Callable after 20 March 1985.
- (k) Exchangeable on or before 14 December 1984 into an equal par value of 133/4%, 15 March 1990.
- (l) Exchangeable on or before 1 February 1985 into an equal par value of 13%, 1 May 1990.
- (m) Exchangeable on or before 29 June 1984 into an equal par value of 121/2%, 1 October 1990.
- (n) Exchangeable on or before 1 November 1985 into an equal par value of 133/4%, 1 February 1991.
- (o) Exchangeable on or before 1 May 1984 into an equal par value of 133/4%, 1 August 1989.
- (p) Exchangeable on or before 1 November 1984 into an equal par value of 133/4%, 1 February 1990.
- (q) Exchangeable on or before 31 January 1986 into an equal par value of 141/2%, 1 May 1991.
- (r) Exchangeable on or before 28 February 1986 into an equal par value of 151/4%, 1 June 1993.
- (s) Exchangeable on or before 1 April 1986 into an equal par value of 143/4%, 1 July 1993.
- (t) Exchangeable on or before 30 June 1986 into an equal par value of 18%, 1 October 1991.
- (u) Exchangeable on or before 31 October 1986 into an equal par value of 151/2%, 1 February 1992.
- (v) Exchangeable on or before 1 April 1987 into an equal par value of 15%, 1 July 1992.
- (x) Exchangeable on or before 1 June 1987 into an equal par value of 141/4%, 1 September 1992.

Les renvois ci-dessous indiquent les particularités de certaines émissions :

- (a) Emprunt sujet à remboursement partiel par le fonds d'amortissement, au pair, aux dates d'échéance des coupons, à partir du 15 avril 1965; ne peut être remboursé intégralement par anticipation avant le 15 octobre 1977.
- (b) Annulation de titres détenus par le fonds de rachat.
- (c) Ces obligations ne peuvent être remboursées par anticipation avant le 1^{er} juin 1978.
- (d) Remboursables par anticipation après le 15 septembre 1996.
- (e) Le 18 mars 1975, le gouvernement canadien a annoncé que les rentes perpétuelles 3% seront remboursées à leur valeur nominale le 15 septembre 1996.
- (g) Remboursables par anticipation, après le 1^{er} octobre 1984.
- (h) Remboursables par anticipation, après le 1^{er} avril 1988.
- (i) Remboursables par anticipation, après le 15 octobre 1988.
- (j) Remboursables par anticipation, après le 20 mars 1985.
- (k) Échangeables, au plus tard le 14 décembre 1984, contre une valeur nominale égale d'obligation 133/4% échéant le 15 mars 1990.
- (l) Échangeables, au plus tard le 1^{er} février 1985, contre une valeur nominale égale d'obligation 13% échéant le 1^{er} mai 1990.
- (m) Échangeables, au plus tard le 29 juin 1984, contre une valeur nominale égale d'obligation 121/2% échéant le 1^{er} octobre 1990.
- (n) Échangeables, au plus tard le 1^{er} novembre 1985, contre une valeur nominale égale d'obligation 121/2% échéant le 1^{er} février 1991.
- (o) Échangeables, au plus tard le 1^{er} mai 1984, contre une valeur nominale égale d'obligation 133/4% échéant le 1^{er} août 1989.
- (p) Échangeables, au plus tard le 1^{er} novembre 1984, contre une valeur nominale égale d'obligation 133/4% échéant le 1^{er} février 1990.
- (q) Échangeables, au plus tard le 31 janvier 1986, contre une valeur nominale égale d'obligation 141/2% échéant le 1^{er} mai 1991.
- (r) Échangeables, au plus tard le 28 février 1986, contre une valeur nominale égale d'obligation 151/4% échéant le 1^{er} juin 1993.
- (s) Échangeables, au plus tard le 1^{er} avril 1986, contre une valeur nominale égale d'obligation 143/4% échéant le 1^{er} juillet 1993.
- (t) Échangeables, au plus tard le 30 juin 1986, contre une valeur nominale égale d'obligation 18% échéant le 1^{er} octobre 1991.
- (u) Échangeables, au plus tard le 31 octobre 1986, contre une valeur nominale égale d'obligation 151/2% échéant le 1^{er} février 1992.
- (v) Échangeables, au plus tard le 1^{er} avril 1987, contre une valeur nominale égale d'obligation 15% échéant le 1^{er} juillet 1992.
- (x) Échangeables, au plus tard le 1^{er} juin 1987, contre une valeur nominale égale d'obligation 141/4% échéant le 1^{er} septembre 1992.

*Users of these measures of capacity utilization are advised to refer to the discussion of them in the May 1980 issue of this Review "Measuring Capacity Utilization: A Technical Note". Particular attention should be paid to the discussion of how the data are to be evaluated and interpreted.

*Les utilisateurs des données des taux d'utilisation des capacités sont invités à se référer à l'étude qui a été publiée sur ce sujet dans la Revue de mai 1980 sous le titre : « Les méthodes d'estimation des taux d'utilisation des capacités ». Il convient d'accorder une attention particulière à l'analyse de la façon dont il faut évaluer et interpréter ces données.

Notes to the tables

Symbols used in charts and tables

| | |
|---|-------------------|
| A | arithmetic scale |
| L | logarithmic scale |
| E | estimated |
| P | preliminary |
| R | revised |
| N | not available |
| C | corrected |

Owing to the rounding of figures, components may not always add to the totals shown. A horizontal rule in the body of the table indicates either a break in the series or that the earlier figures are available only at a more aggregated level.

Cansim—Databank identification numbers

Many of the time series published in the Review are available from Statistics Canada in machine-readable form, for use on computers, or in print-outs. Each time series of annual, quarterly, monthly or weekly data on the Cansim system (Canadian Socio-Economic Information Management) has an identification number. Series maintained by Statistics Canada have D or L prefixes (e.g. D1432), those maintained by the Bank of Canada have a B prefix (e.g. B318) and those maintained by Canada Mortgage and Housing Corporation have a H prefix (e.g. H48). The identification number is given as a reference at the top of each column of data and refers to the series of weekly, monthly or quarterly data in that column. Where the frequency of a series as it is available on Cansim is different from that shown in the table or where a combination of quarterly and monthly data is shown in the table, the frequency of the Cansim series is indicated by a superscript M if monthly or by a superscript Q if quarterly. Current and revised data are entered into Cansim immediately on release.

Weekly series

The tables in the Review do not cover a full year of weekly data. For all Wednesday series, in the event a holiday falls on a Wednesday, data for the preceding business day will be shown. Figures for weekly series for which the Bank of Canada is the source are available on request to the Department of Monetary and Financial Analysis, Bank of Canada, Ottawa K1A 0G9.

Notes to the tables

The reference notes to the statistical tables in the Review, which prior to 1981 were included in each monthly issue, are now printed under a separate cover. The separate section of notes will be updated and reprinted at approximately yearly intervals. Additional copies of the explanatory notes may be obtained by writing to the Bank of Canada Review, Public Information Division, Secretary's Department, Bank of Canada, Ottawa K1A 0G9.

This section of the monthly Review will include only revisions to the notes as may be required to keep them current for users of the statistical tables, as well as the reference notes pertaining to tables that are published only occasionally in the Review.

Notes relatives aux tableaux

Abréviations utilisées dans les graphiques et les tableaux

| | |
|---|--------------------------|
| A | Échelle arithmétique |
| L | Ordonnées logarithmiques |
| E | Estimations |
| P | Chiffres provisoires |
| R | Chiffres révisés |
| N | Chiffres non disponibles |
| C | Chiffres corrigés |

Du fait que les chiffres sont arrondis, l'addition des éléments d'un tableau ne correspond pas toujours exactement au total indiqué. Une ligne horizontale dans le corps d'un tableau indique soit qu'il y a une rupture dans une série, soit que les données des périodes antérieures ne sont disponibles que sous une forme plus agrégée.

Cansim — Numéros de référence des séries de Databank

Nombre des séries chronologiques publiées dans la Revue peuvent être obtenues de Statistique Canada sous une forme directement exploitable par ordinateur ou sous la forme d'imprimés. Elles font partie intégrante du fichier Cansim¹, dont chaque série chronologique — annuelle, trimestrielle, mensuelle ou hebdomadaire — est identifiée par un numéro de référence. Les numéros des séries élaborées par Statistique Canada sont précédés de la lettre «D» ou «L» (par exemple : D1432), ceux des séries de la Banque du Canada, de la lettre «B» (par exemple : B318), et ceux de la Société canadienne d'hypothèques et de logement, de la lettre «H» (par exemple : H48). Dans nos tableaux, le numéro apparaît en tête de la colonne et identifie la série hebdomadaire, mensuelle ou trimestrielle qui figure dans la colonne; dans les cas où les fréquences de données figurant au fichier Cansim et dans un tableau de la Revue diffèrent ou lorsque le tableau comporte à la fois une série mensuelle et une série trimestrielle, la fréquence de la série Cansim est indiquée par la lettre «M» si la série est mensuelle et par la lettre «Q» si elle est trimestrielle.

¹ Ce sigle est une abréviation de *Canadian Socio-Economic Information Management System* — Système canadien de traitement des données socio-économiques.

Séries hebdomadaires

Dans les tableaux de la Revue, les séries de données hebdomadaires ne couvrent pas une année entière. Lorsque le mercredi est un jour férié, les statistiques du mercredi sont établies à partir des données du jour ouvrable précédent. On pourra obtenir les données provenant de la Banque du Canada en s'adressant au département des Études monétaires et financières, Banque du Canada, Ottawa K1A 0G9.

Notes relatives aux tableaux

Les notes relatives aux tableaux de la Revue, qui jusqu'à la fin de 1981 étaient reproduites dans chaque livraison, sont désormais imprimées séparément. Les éditions ultérieures seront mises à jour et publiées environ une fois par année. Ceux qui désirent recevoir d'autres exemplaires des notes sont priés de s'adresser à la Revue de la Banque du Canada, Section de l'information, Secrétariat, Banque du Canada, Ottawa K1A 0G9.

La présente section de la Revue ne contiendra que les mises à jour essentielles à l'interprétation des statistiques et les notes se rapportent aux tableaux publiés à des fréquences variables dans la Revue.

D2 – D3

Source: Bank of Canada, Statistics Canada

Data on Table D2 are derived from total trust and mortgage loan company data collected quarterly by Statistics Canada (available in "Financial Institutions", Catalogue 61-006) and from a monthly survey by the Bank of Canada covering companies that at the end of 1984 represented over 80 per cent of total assets in these industries. For months between quarter-ends, items on Table D2 are estimated individually from this survey to arrive at representative industry-wide figures. As a result, total assets and liabilities for the intra-quarter months may not be equal as they are the sums of the component series. Where there are foreign currency assets or liabilities these are included in the relevant component series. Data for the chartered bank mortgage loan subsidiaries appearing on Table D3 originate directly from the monthly survey by the Bank of Canada.

• *Cash and demand deposits* include deposits placed in chartered banks and other financial institutions in Canada and outside Canada. • *Other term and notice deposits* include swapped deposits at chartered banks and deposits in institutions other than chartered banks. • *Short-term paper and bankers' acceptances* are bonds, debentures and notes with an original term to maturity of one year or more. • *Personal loans* comprise both secured and unsecured loans. • *Collateral business loans* include secured loans placed with investment dealers as well as other collateral loans, and include farm loans. • *Other assets* comprise other investments in Canada as well as investments in institutions and corporations outside Canada, accounts receivable and accrued revenue, fixed assets, real estate and other assets. • *Total major assets* include cash and demand deposits, treasury bills, term and notice deposits, short-term paper and collateral loans placed with investment dealers plus Canadian bonds, mortgage loans and sales agreements, personal loans, and Canadian preferred and common shares. Prior to January 1984 foreign securities were also included; after that date, these securities are included in other assets.

Daily interest deposits include only those deposits held by companies surveyed by the Bank of Canada. • *Tax-exempt deposits* include RRSPs, RHSPs and other tax-sheltered funds placed in savings or term deposits. • *Other promissory notes* include promissory notes with an original term to maturity of one year or more, subordinated notes and other notes.

• *Total major liabilities* comprise total deposits, bank loans, debentures issued under trust indentures, and promissory notes. • *Other liabilities* are debt owing to parent, subsidiary and affiliated companies, accounts payable and accrued liabilities, corporation income taxes payable, deferred income, mortgages payable, deferred income taxes and other liabilities.

Source: Statistics Canada

Data are obtained from the Statistics Canada publication "The Consumer Price Index", Catalogue 62-001. Beginning in January 1985 the weights used in constructing the index are based on 1982 consumer expenditure patterns, replacing the 1978 weights used from April 1982. Two earlier reweightings occurred in October 1978 incorporating 1974 consumer expenditure patterns and May 1973 using 1967 weights. In February 1983, with the release of the January 1983 consumer price index, the time base was changed in a purely arithmetic operation from 1971 to 1981=100. Further information on these revisions, as well as on the concepts and methodology, may be obtained from Statistics Canada publications. Effective with the release of the January 1985 numbers Statistics Canada revised the definition of the shelter component to include both goods and services. A consistent historical series was provided back to September 1978.

The percentage changes shown in Column 15 of Table A1 are the rates published by Statistics Canada in Catalogue 62-001.

D2 et D3

Source : Banque du Canada, Statistique Canada

Les données qui figurent au tableau D2 sont tirées des données de l'ensemble du secteur des sociétés de fiducie ou de prêt hypothécaire, recueillies tous les trimestres par Statistique Canada (publiées dans «Institutions financières», no de catalogue 61-006) et d'une enquête mensuelle menée par la Banque du Canada auprès d'un échantillon de sociétés de fiducie ou de prêt hypothécaire qui représente plus de 80 % de l'actif de ce secteur. Pour ce qui est des mois qui ne coïncident pas avec une fin de trimestre, les chiffres des postes figurant au tableau D2 sont obtenus par estimation cas par cas à partir des données de l'enquête mensuelle, pour en arriver à des chiffres représentatifs du secteur. En conséquence, l'ensemble de l'actif pour les mois qui ne coïncident pas avec une fin de trimestre peut ne pas être égal à l'ensemble du passif correspondant, puisque chacun de ces totaux résulte de l'addition des chiffres de chacun des éléments de la série visée. Les avoirs et engagements en monnaies étrangères sont inclus le cas échéant dans chacune des séries correspondantes. Les données qui figurent au tableau D3 sur les filiales hypothécaires des banques à charte sont tirées directement de l'enquête mensuelle de la Banque du Canada.

• *L'encaisse et les dépôts à vue* comprennent les dépôts confiés aux banques à charte et aux autres institutions financières au Canada et à l'étranger. • *Les autres dépôts à terme ou à préavis* comprennent les dépôts swaps dans les banques à charte et les institutions autres que les banques à charte. • Le poste *Papier à court terme et acceptations bancaires* comprend les obligations, les débetures et les billets, à échéance d'un an ou plus. • *Les prêts personnels* comprennent les prêts garantis ou non garantis. • *Les prêts sur nantissement commerciaux* comprennent les prêts garantis accordés aux courtiers en valeurs mobilières de même que les autres prêts sur nantissement; ils comprennent également les prêts agricoles. • *Les autres éléments de l'actif* comprennent les autres placements au Canada et les placements dans les institutions et les sociétés constituées à l'étranger, les comptes-clients, les produits constatés par régularisation, les immobilisations, les immeubles ou biens réels et autres avoirs. • Le poste *Ensemble des principaux avoirs* comprend l'encaisse et les dépôts à vue, les bons du Trésor, les dépôts à terme ou à préavis, le papier à court terme et les prêts sur nantissement accordés aux courtiers en valeurs mobilières, ainsi que les obligations canadiennes, les prêts hypothécaires et les contrats de vente, les prêts personnels et les actions canadiennes privilégiées ou ordinaires. Avant le mois de janvier 1984, ce poste comprenait les titres étrangers. Depuis cette date, les titres étrangers figurent dans la rubrique «Autres éléments de l'actif».

• Le poste *Dépôts à intérêt quotidien* ne comprend que les dépôts détenus par les sociétés comprises dans l'enquête de la Banque du Canada. • *Les dépôts exempts d'impôts* comprennent les REER, les REEL et les autres fonds non imposables placés sous forme de dépôts d'épargne, de dépôts à vue ou de dépôts à terme. • *Les autres billets à ordre* comprennent les billets à ordre à échéance d'un an ou plus, les billets subordonnés et autres billets. • *L'ensemble des principaux engagements* comprend l'ensemble des dépôts, des prêts bancaires, des débetures émises en vertu de contrats de fiducie et des billets à ordre. • *Les autres éléments du passif* comprennent les sommes dues aux sociétés mères, aux filiales et aux sociétés affiliées, les comptes-fournisseurs et les charges à payer, les impôts à payer sur le revenu des sociétés, les revenus différés, les emprunts hypothécaires, les impôts sur le revenu différés et les autres engagements.

Source : Statistique Canada

Les données proviennent de la publication de Statistique Canada intitulée «L'indice des prix à la consommation» (n° 62-001 au catalogue). À compter de janvier 1985, les pondérations qui servent au calcul de l'indice sont fondées sur la structure des dépenses de 1982 et remplacent les pondérations de 1978, qui sont utilisées depuis avril 1982. Les pondérations avaient été révisées à deux reprises auparavant, soit en octobre 1978 pour tenir compte de la structure des dépenses de 1974, et en mai 1973 pour tenir compte de la structure des dépenses de 1967. En février 1983, après publication des données de l'indice des prix à la consommation pour janvier 1983, l'ancienne année de base, soit 1971, a été remplacée par 1981; les opérations effectuées ont été purement arithmétiques. On trouvera dans les publications de Statistique Canada de plus amples renseignements sur ces révisions ainsi que sur les concepts et la méthodologie utilisés. La publication des données de janvier 1985 a coïncidé avec la révision par Statistique Canada de la définition du logement; la nouvelle définition de cette composante englobe à la fois des biens et des services. La série chronologique utilisant cette définition remonte à septembre 1978.

Les taux de variation reproduits à la colonne 15 du Tableau A1 sont extraits de la publication n° 62-001 de Statistique Canada.

Source: Bank of Canada

Issues payable in foreign currencies have been converted into Canadian dollars at the average noon market rate for the month. Finance company subsidiaries of automobile companies are included with financial corporations. To the end of 1972, all other subsidiary companies engaged in financing the parent companies' sales are classified with the parent companies; from 1973, they are included with finance and loan companies.

- *Corporate bonds* include all issues of Canadian corporations payable in Canadian dollars or in other currencies with the exception of finance company and commercial paper with an original term to maturity of one year or less and issues sold to a parent company, whether this parent is incorporated in Canada or abroad.

Data on net new issues of corporate bonds and stocks, by industry classification, are available quarterly from 1955.

Source : Banque du Canada

La valeur nominale des émissions libellées en monnaies étrangères a été convertie en dollars canadiens au cours mensuel moyen du change à midi. Les sociétés de financement comprennent les sociétés de financement filiales des constructeurs de véhicules automobiles. Jusqu'à la fin de 1972, les statistiques relatives à toutes les autres filiales qui ont pour objet de financer les ventes des sociétés mères sont comprises dans celles de ces sociétés de financement ou de prêt.

- *Les obligations des sociétés* englobent toutes les émissions des sociétés canadiennes libellées en dollars canadiens ou en monnaies étrangères, à l'exclusion, toutefois, du papier émis par les sociétés de financement et du papier commercial dont l'échéance à l'émission ne dépasse pas un an, ainsi que des émissions vendues à des sociétés mères que ces dernières aient été constituées au Canada ou à l'étranger.

Les statistiques se rapportant aux émissions nettes d'actions et d'obligations de sociétés réparties selon la branche d'activité économique sont disponibles, par trimestre, à partir de 1955.

Canada: Copper Token,
Red River and Assiniboine Bridge Co.

Many early Canadian companies and concerns have long since disappeared, leaving behind only the smallest physical indication of their existence or of the nature of their business. The Red River and Assiniboine Bridge Company of Winnipeg is an excellent case in point.

Although information is sketchy, this company apparently operated a passage service across the Red River in the late nineteenth century. Those using the service were required to pay a toll ranging from 2¢ to 20¢ depending upon their mode of transportation. To facilitate payment, the company issued two series of passenger tokens. The first were among the earliest transportation tokens in Manitoba. They were crudely manufactured in brass or copper and hand-cut into an irregular shape with an abbreviation of the company's name and the denomination hand-punched onto the surface. These tokens were superseded by a series dated 1898, which featured finer workmanship and was manufactured for the exclusive use of passengers travelling on foot. Apparently, customers using other forms of transportation were required to pay cash.

The token featured on this month's cover is from the second series. About the size of a current Canadian fifty-cent piece, it bears the name of the company with a facsimile signature of its president, Mr. C. Chapman, on one side, and the denomination, date, and type of usage on the other. The illustrated token is the only known example in copper — all other specimens are made of aluminum.

This token forms part of the National Currency Collection, Bank of Canada. Photography by James Zagon, Ottawa.

Couverture :

Canada : Jeton de cuivre, Red River and Assiniboine Bridge Co.

Un grand nombre des toutes premières compagnies et entreprises canadiennes sont disparues depuis longtemps, ne laissant que très peu de traces pouvant rendre compte de leur existence ou nous renseigner sur la nature de leurs activités. La Red River and Assiniboine Bridge Company de Winnipeg en est un bon exemple.

Cette compagnie, dont on sait fort peu de choses, aurait exploité un service de traversiers sur la rivière Rouge vers la fin du XIX^e siècle. Ceux qui désiraient faire la traversée devaient payer entre 2 et 20 cents selon leur mode de transport. Pour faciliter les opérations, la compagnie émit deux séries de jetons de passage. Les jetons de la première série comptent parmi les plus anciens utilisés au Manitoba par des entreprises de transport. De fabrication grossière, ces jetons étaient faits en laiton ou en cuivre et découpés à la main, ce qui explique leur forme irrégulière; le nom abrégé de la compagnie et la valeur de la pièce y étaient apposés manuellement à l'aide d'un poinçon. Ils furent supplantés par les pièces d'une deuxième série, au millésime de 1898, qui étaient mieux ouvrees et servaient uniquement aux piétons. Les autres voyageurs devaient apparemment payer leur passage comptant.

Le jeton reproduit sur la page couverture appartient à la seconde série. Sa taille est à peu près identique à celle de l'actuelle pièce de cinquante cents canadienne; à l'avvers, on peut voir le nom de la compagnie émettrice et un fac-similé de la signature du président de celle-ci, C. Chapman, et au revers la valeur, le millésime et l'utilisation du jeton. Celui-ci est le seul spécimen connu de cette série qui soit en cuivre, tous les autres étant faits d'aluminium.

Ce jeton fait partie de la Collection nationale de monnaies, Banque du Canada. Photographie : James Zagon, Ottawa.

Patterns of borrowing and lending during 1984

L'évolution des flux de crédit en 1984

Credit demands of major non-financial borrowers rose more rapidly in 1984 than in the previous two years. This pickup originated mostly in private sector borrowing, which grew at a somewhat faster pace than GNP in 1984 and was concentrated in business and consumer loans. Nevertheless, the pattern of private sector borrowing continued to reflect the restructuring of business balance sheets that has been under way since 1982, as well as the cautious approach of both businesses and households towards indebtedness. The public sector was again the major borrower in 1984, although the ratios of public financing to total borrowing and also to GNP were slightly lower than their levels in 1982 and 1983. Through the year, most borrowers, with the exception of the federal government, reduced their long-term debt issues. Intermediation activity by deposit-taking institutions, primarily the chartered banks, continued to recover from the major drop experienced in 1982.

Financing by businesses, households and governments

In response to the continuing expansion in economic activity, growth in total demand for credit accelerated in 1984, despite higher average interest rates than in 1983 (Table I and Chart I). Total financing relative to GNP rose from 13.5 per cent in 1983 to 15.3 per cent in 1984 but these figures remain well below the average of more than 20 per cent observed in the 1975-81 period. In fact, the 1984 recovery in credit demand was moderated by the continuing efforts of non-financial businesses and

Le flux des crédits obtenus par les principaux agents économiques non financiers a augmenté à un rythme plus rapide en 1984 qu'au cours des deux années précédentes. Les emprunts du secteur privé se sont accrus en 1984 à un taux supérieur à celui du PNB et cette croissance s'est surtout manifestée aux chapitres du crédit commercial et du crédit à la consommation. Cependant, l'évolution du financement octroyé au secteur privé a continué de refléter les profondes modifications observées depuis 1982 dans la structure de l'endettement des entreprises ainsi que l'attitude prudente adoptée par les entreprises et les ménages vis-à-vis du crédit. En 1984, le secteur public est demeuré le principal emprunteur, bien que la proportion de ses emprunts au financement total et au PNB ait légèrement diminué comparativement aux niveaux de 1982 et de 1983. Au cours de l'année, la majorité des emprunteurs, à l'exception du gouvernement fédéral, ont réduit leurs émissions de titres à long terme. Après l'important ralentissement observé en 1982, les opérations d'intermédiation réalisées par les institutions financières de dépôt ont poursuivi la remontée amorcée en 1983 et ce sont les banques à charte qui ont le plus bénéficié de l'accroissement de cette activité.

Financement obtenu par les entreprises, les ménages et les gouvernements

Favorisée par la croissance sensible et continue de l'activité économique, la demande de crédit s'est accrue en 1984 même si les taux d'intérêt ont été en moyenne plus élevés qu'en 1983 (voir Tableau I et Graphique I). La proportion du financement total par rapport au PNB, qui était de 13,5 % en 1983, est passée à 15,3 % en 1984. Ces ratios demeurent cependant bien en deçà du niveau moyen de plus de 20 % enregistré entre 1975 et 1981. En fait, le redressement observé en 1984 a été atténué par les efforts que

households, especially since 1982, to limit their indebtedness. Through the late 1970s and early 1980s, businesses, particularly those in the resource sector, had sharply increased their demand for credit in the expectation of substantial increases in their product prices, continuing inflationary pressures and sustained economic growth. The severe recession of 1982, together with the sharp drop in inflation, an easing of inflationary expectations and yet a continuation of relatively high interest rates, left these businesses in a vulnerable financial situation, thus necessitating a restructuring of their balance sheets. As for households, they had begun, even before the recession, to slow their pace of borrowing, deterred mainly by high interest rates and by slower increases in house prices relative to the rate of inflation.

Financing by businesses

Funds raised by non-financial businesses rose substantially to \$15.8 billion in 1984 compared to the \$3.7 billion raised in 1983 (Table II). Nevertheless, this total amount was still well below the \$21.5 billion average recorded between 1975 and 1981, a period that included the exceptionally high volume of borrowing by businesses for large investment projects in the energy sector and the wave of takeovers of foreign firms by Canadian companies.

This upsurge in business borrowing in 1984 was not directly associated with the increase in business investment. Indeed, the increase in total investment spending, which was relatively small in 1984 despite the significant rebuilding of inventories, was almost equal to the rise in internally generated funds. Moreover, the level of internally generated funds was sufficient to finance a high proportion of total capital and inventory investment. Through the 1976-81 period the business sector had borrowed larger amounts than needed to meet their external financing requirements, but in 1982 and 1983 some of the accumulated liquid assets of businesses were run down in order to finance part of their investments (Chart II)*. In 1984, however, borrowing by businesses was again in excess of external financing requirements. In several sectors, there was an increase in financial assets, especially in the form of accounts receivable and claims on associated businesses.

* External financing requirements by business are calculated as the difference between investments in fixed capital and inventories, and internally generated funds in the form of retained earnings, inventory valuation adjustments, capital assistance and capital consumption allowances.

les entreprises non financières et les ménages déployaient spécialement depuis 1982 pour limiter leur endettement. À la fin des années soixante-dix et au tout début des années quatre-vingt, les entreprises, surtout celles oeuvrant dans le secteur des matières premières, avaient considérablement accru leur recours au crédit, car elles anticipaient des hausses de prix substantielles pour certains de leurs produits, une poursuite des pressions inflationnistes ainsi qu'une croissance soutenue de l'activité économique. La forte récession de 1982 conjuguée à la baisse abrupte du taux d'inflation, à l'atténuation des attentes inflationnistes et aux niveaux relativement élevés des taux d'intérêt ont placé ces entreprises ainsi que les ménages dans une situation financière très inconfortable, les forçant à restructurer leurs bilans. Notons que les ménages avaient déjà commencé, avant la récession, à réduire le rythme auquel ils s'endettaient, en raison principalement du haut niveau des taux d'intérêt et du ralentissement, à la fin de 1981, de la hausse du prix des maisons relativement au taux d'inflation.

Financement obtenu par les entreprises

En 1984, l'endettement des entreprises s'est accru de façon non négligeable (voir Tableau II). Par rapport à 1983, année où l'endettement n'avait augmenté que de 3,7 milliards de dollars, l'accroissement de 15,8 milliards de dollars est considérable, mais il demeure bien en deçà de la progression moyenne de 21,5 milliards enregistrée entre 1975 et 1981. On se souviendra du volume exceptionnellement élevé des concours obtenus par les entreprises de 1979 à 1981 pour financer les grands projets d'investissement réalisés dans le secteur énergétique et la vague des prises de contrôle des sociétés étrangères par des sociétés canadiennes.

La forte remontée des emprunts des entreprises en 1984 peut difficilement être associée à la tenue des investissements. En effet, l'augmentation des investissements, qui a été relativement modeste en 1984, en dépit de la reconstitution sensible des stocks, a été à peu près équivalente à l'augmentation des ressources d'autofinancement. Comme en 1983, les entreprises ont donc eu la possibilité de financer largement ces dépenses avec leurs fonds propres. Après avoir emprunté, entre 1976 et 1981, des sommes supérieures à leurs besoins externes de financement, les entreprises ont préféré se départir en 1982 et en 1983 de certains actifs liquides pour financer une partie de leurs investissements (voir Graphique II)*. En 1984, le chiffre des emprunts a dépassé de nouveau celui des besoins externes de financement. Dans plusieurs secteurs, on a enregistré l'accumulation d'actifs financiers, notamment sous forme de comptes à recevoir et de créances sur des entreprises associées.

* Les besoins externes de financement des entreprises sont définis par la différence entre leurs investissements sous forme de capital fixe et de stocks, d'une part, et leurs ressources d'autofinancement, sous forme de bénéfices non répartis, d'ajustements de la valeur des stocks, de subventions d'équipement et de provisions pour amortissement de capital, d'autre part.

*Includes agriculture and institutions.

(1) Canadian dollar issues placed abroad are included with foreign currency bonds and foreign currency issues placed in Canada are included with Canadian dollar bonds.

(2) Includes income debenture bonds.

(3) Includes term preferred shares.

(4) Total business loans plus foreign currency loans to residents other than the federal government. These data also include loans made by institutions affiliated with foreign banks, most of which became chartered banks in the last half of 1981 and the first half of 1982.

⁽⁵⁾ Includes trust and mortgage loan companies (excluding bank mortgage subsidiaries), credit unions and caisses populaires, life insurance companies, investment funds and real estate investment trusts.

*Y compris le secteur agricole et les institutions.

¹ Les émissions en dollars canadiens placées à l'étranger sont groupées avec les obligations en monnaies étrangères; de même, les émissions en monnaies étrangères placées au Canada sont groupées avec les obligations en dollars canadiens.

⁽²⁾ Y compris les obligations à intérêt conditionnel.

(3) Y compris les actions à terme privilégiées.

¹ Ensemble des prêts aux entreprises et des prêts en monnaies étrangères à des résidents autres que le gouvernement canadien. Ces données comprennent aussi les prêts octroyés par les institutions affiliées à des banques étrangères, dont la plupart ont obtenu le statut de banque à charte au dernier semestre de 1981 ou au premier semestre de 1982.

(15) Comprend les sociétés de fiducie ou de prêt hypothécaire (à l'exclusion des filiales hypothécaires des banques), les crédit unions et les caisses populaires, les compagnies d'assurance-vie, les sociétés de placement et les fiducies de placement immobilier.

The increase in business credit demand in 1984 was met by a pickup in short-term financing, especially in bank loans which had declined over the previous two years (Chart III). Financing through common share issues was considerably lower in 1984, while bond issues increased only slightly. At the end of the 1970s and in the early 1980s, business financing had been largely through short-term loans so that businesses were vulnerable to the subsequent rise in interest rates. Furthermore, the extensive recourse to credit through this period had considerably raised the ratio of debt to shareholders' equity, which peaked at the end of 1982. With the drop in income and the rise in carrying costs in 1982, businesses sharply reduced their short-term borrowing and began to restructure their liabilities. Given the increase in retained earnings in 1983, the receptiveness of the stock market and the relatively low level of interest

L'augmentation des emprunts des entreprises en 1984 est associée à la reprise des emprunts à court terme, en particulier des prêts bancaires obtenus, lesquels avaient diminué au cours des deux dernières années (voir Graphique III). Les émissions d'actions ordinaires ont considérablement diminué en 1984 tandis que les émissions d'obligations n'ont que légèrement augmenté. A la fin des années soixante-dix et au début des années quatre-vingt, le financement était constitué en grande partie d'emprunts à court terme, de sorte que les entreprises étaient très exposées à l'augmentation des taux d'intérêt. De plus, l'utilisation massive du crédit avait provoqué une hausse considérable du ratio de la dette à l'avoir des actionnaires, lequel avait atteint un sommet à la fin de 1982. Depuis la chute des revenus et la hausse des coûts d'intérêts observées en 1982, les entreprises ont considérablement limité leurs emprunts à court terme et ont commencé à modifier la structure de leur passif. En 1983, dans le contexte de l'augmentation des bénéfices non distribués, de la bonne tenue du marché boursier et du niveau relativement

Graphique II Emprunts des entreprises non financières et besoins externes de financement

rates compared with the year before, businesses began to pay down short-term loans, raising funds instead through issues of common shares and, to a lesser extent, of long-term bonds. As restructuring continued in 1984, the ratio of debt to shareholders' equity fell further and is now at a much lower level than in 1981 and 1982. The restructuring process in 1984, however, was at a somewhat slower pace because of the weaker tone of the stock market*, which deterred businesses from issuing share capital, especially common shares. In contrast to the decline in common share issues, more preferred shares were issued, often with new, more attractive features. Generally, in 1984, because of this slowdown in stock

bas des taux d'intérêt par rapport à 1982, la stratégie des entreprises consistait à rembourser les emprunts à court terme au profit d'une augmentation des émissions d'actions ordinaires et, dans une moindre mesure, des émissions d'obligations à long terme. Au cours de 1984, les entreprises ont poursuivi la restructuration de leur bilan: le ratio de la dette à l'avoir des actionnaires a continué de diminuer pour s'établir à un niveau sensiblement plus bas que celui observé en 1981 et 1982. Cependant, ce processus de restructuration a été quelque peu ralenti en 1984 par la faiblesse du marché boursier*, ce qui a forcé les entreprises à réduire l'ensemble de leurs émissions d'actions. Malgré cette baisse, elles ont émis plus d'actions privilégiées dont certaines avaient de nouvelles caractéristiques. D'une façon générale, le ralentissement de l'activité

* The Toronto Stock Exchange Composite Index fell by more than 400 points during the first seven months of the year and regained about 250 points between August and December.

L'indice synthétique de la Bourse de Toronto a chuté de plus de 400 points dans les sept premiers mois de l'année pour regagner à peu près 250 points entre août et décembre.

Chart III Borrowing by non-financial business
Graphique III Emprunts des entreprises non financières

market activity, the uncertainty concerning future movements in interest rates and the financing requirements associated with the inventory buildup, businesses were encouraged to resume short-term borrowing. This renewed demand for short-term credit was concentrated in bank loans rather than short-term paper in response to the reduction of more than 60 basis points in the overall spread between the prime lending rate and the bankers' acceptance rate (Chart IV)*.

Financing by households

In 1984, total household credit increased only moderately following the 1983 recovery (Tables III and IV). Household borrowing, which had been almost nil in 1982, increased to 3.4 per cent of personal disposable income in 1983 and to 3.8 per cent in 1984. This rate, however, has remained below the average recorded over the last decade (Chart V).

* The differential between the prime lending rate and the bankers' acceptance rate does not include the stamping fees applied to bankers' acceptances, which were set at 3/4 of 1 per cent in 1984, representing a decline of 25 basis points.

boursière, l'incertitude quant à l'évolution future des taux d'intérêt ainsi que l'augmentation des besoins de financement associée à la reconstitution des stocks ont poussé les entreprises à s'adresser de nouveau aux marchés à court terme en 1984. La reprise du financement à court terme s'est principalement effectuée à l'avantage des prêts bancaires. Ce mouvement a été influencé par la diminution, de plus de 60 points de base, de l'écart moyen entre le taux de base des prêts aux entreprises et le taux des acceptations bancaires (voir Graphique IV)*.

Financement obtenu par les ménages

L'augmentation du crédit aux particuliers n'a connu, après la reprise observée en 1983, qu'une légère progression en 1984 (voir Tableaux III et IV). Ainsi, la proportion des emprunts des ménages au revenu personnel disponible, qui était presque nulle en 1982, est passée à 3,4 % en 1983 pour atteindre 3,8 % en 1984; cependant, cette proportion est restée à un niveau inférieur à la moyenne des années soixante-dix (voir Graphique V).

* L'écart entre le taux de base des prêts aux entreprises et le taux des acceptations bancaires ne tient pas compte des commissions d'acceptation appliquées aux acceptations bancaires, lesquelles ont été fixées à 3/4 de 1 % en 1984, soit une diminution de 25 points de base.

⁽²⁾ Comprend tant les prêts hypothécaires à l'habitation que les autres prêts hypothécaires.

⁽³⁾ Ces chiffres ont été influencés par l'intégration, aux données des banques, des données des sociétés de financement ou de prêt à la consommation filiales des banques à charte et par la fusion, effectuée le 1^{er} novembre 1981, d'IAC Limitée et de la Banque Continentale du Canada.

⁽⁴⁾ Comprend les banques d'épargne du Québec et les compagnies d'assurance-biens et d'assurance contre des risques divers.

Mainly because of the wide spread between interest rates and the rate of inflation as well as uncertainties about employment trends, the attitude of households towards taking on more debt remained cautious, although to a lesser extent than in 1983. The personal savings rate declined only slightly from the high level of the previous year. In 1983, a large proportion of household savings was used to repay loans and make larger down payments towards purchases of houses and durable goods. This was not as apparent in 1984; rather, households stepped up their investments in financial assets held in the form of deposits, treasury bills and Canada Savings Bonds. Moreover, there was a shift in the proportion of savings placed in each of these instruments. After increasing by a little more than 1 per cent in 1983, personal bank deposits grew by about 7 per cent in 1984, while the growth of assets held in the form of Canada Savings Bonds decelerated and growth of deposits in non-bank financial institutions held at about 10 per cent. Furthermore, facilitated by certain changes made by distributors of treasury bills, which enabled treasury bill

En raison principalement du grand écart entre les taux d'intérêt et le taux d'inflation et aussi des incertitudes entourant l'évolution de l'emploi, les ménages ont affiché en 1984, mais dans une moindre mesure qu'en 1983, un comportement prudent vis-à-vis de l'endettement. En 1984, le taux d'épargne a enregistré une faible baisse par rapport au niveau encore élevé enregistré l'année précédente. En 1983, une grande proportion de l'épargne des ménages avait servi à rembourser des emprunts et à verser des paiements plus élevés lors des achats de maisons et de biens durables. Au cours de la dernière année, cette pratique n'a pas semblé aussi importante qu'en 1983, de sorte que la progression de l'ensemble des avoirs financiers détenus sous forme de dépôts, de bons du Trésor et d'obligations d'épargne du Canada s'est légèrement accrue. De plus, la proportion de l'épargne placée dans chacun de ces instruments a quelque peu changé. Après avoir augmenté d'un peu plus de 1 % en 1983, les dépôts des particuliers dans les banques se sont accrus d'environ 7 % en 1984, alors que la progression des dépôts dans les institutions parabancaires s'est maintenue au taux de 10 % et que celle des obligations d'épargne du Canada a ralenti. D'autre part, il semble qu'au cours de 1984, les ménages aient acheté une part beaucoup plus importante des nouvelles émissions de bons du

purchases to be made in smaller denominations, individuals apparently bought a considerably larger amount of new treasury bills than in 1983. This rise in treasury bill holdings and bank deposits occurred mainly around the middle of 1984 when Canada Savings Bond encashments were particularly heavy. As the rebound in loan demand added to their need for funds, chartered banks attracted a portion of the funds that thus became available by offering more attractive interest rates on personal term deposits.

Consumer loans rose significantly in 1984 compared with the previous two years. Following a 2.9 per cent decline in 1982, these loans increased by 3.9 per cent in 1983 and by 10.1 per cent in 1984. This acceleration resulted from another substantial increase in consumer expenditures on durable goods which, after falling 2.6 per cent in 1982, rose by 14.8 per cent in 1983 and 13.6 per cent in 1984. Moreover, the ratio of consumer loans to expenditures on durable goods continued to increase, from 6 per cent in 1983 to 12.9 per cent in the first half of 1984 and to 15.4 per cent in the second half; nevertheless, the ratio remained well below the 20 per cent average recorded between 1975 and 1980. This recent increase in consumer credit demand appears to have reflected the greater optimism of households following the improvement in their financial situation and continued economic growth.

Outstanding residential mortgage credit rose by a little over 6 per cent in 1984; this was somewhat less than in 1983 but considerably below the increases over the last decade. Housing starts were weak in 1984, dropping almost to the low reached during the 1982 recession. This decline in activity can be explained in part by the phasing out of several government programs implemented in 1983 which had accelerated new housing construction. As was the case in the two preceding years, the mortgage market was sustained in 1984 by the demand for existing housing. Mortgage loan demand was especially strong in the first half of the year despite the rise in interest rates. Through this period expectations of further rate increases appear to have contributed to the expansion in the volume of mortgage loans from April to June at the expense of activity in the second half of the year.

Chartered banks were the most active agents in the mortgage lending market in 1984. In the first half of the year, when the market was relatively strong, the banks reduced the spread between the rates on their mortgage loans and their guaranteed investment certificates, thereby attracting about 50 per cent of the new mortgage loan demand. Also,

Trésor. Ces achats font suite à certains changements sur les marchés financiers, lesquels permettent l'acquisition de bons du Trésor en plus petites coupures. L'augmentation de ces bons et des dépôts bancaires s'est surtout produite au milieu de 1984 dans la vague des remboursements d'obligations d'épargne du Canada. Les banques, dont les besoins de financement étaient devenus plus importants avec la reprise de la demande de prêts, ont récupéré une part des fonds disponibles en offrant, dès le début de 1984, des taux plus attrayants sur les dépôts à terme des particuliers.

L'accroissement de l'encours des prêts à la consommation en 1984 a été considérable par rapport aux deux années précédentes. Après avoir diminué de 2,9 % en 1982, ces prêts ont augmenté de 3,9 % en 1983, puis de près de 10,1 % en 1984. La progression enregistrée en 1984 résulte de l'augmentation sensible des dépenses en biens durables, qui a été de -2,6 % en 1982, de 14,8 % en 1983 et de 13,6 % en 1984. De plus, le rapport entre le flux des crédits à la consommation et les dépenses en biens durables a continué d'augmenter en 1984, passant de seulement 6 % en 1983 à 12,9 % au premier semestre de l'année et à 15,4 % au second semestre; ces chiffres restent néanmoins nettement au-dessous du taux moyen de plus de 20 % enregistré entre 1975 et 1980. L'augmentation récente de ce ratio traduit le plus grand optimisme que les ménages ont affiché face à l'amélioration de leur situation financière et à la persistance de la croissance économique.

Le taux d'accroissement de l'encours des prêts hypothécaires en 1984 a été d'un peu plus de 6,3 %, c'est-à-dire légèrement inférieur à celui de 1983, mais beaucoup plus faible que celui des années soixante-dix. Les mises en chantier ont été faibles en 1984, glissant jusqu'à un niveau proche du creux enregistré pendant la récession de 1982. Cette baisse d'activité s'explique en partie par le retrait de plusieurs programmes gouvernementaux mis sur pied en 1983 qui avaient alors accéléré la construction de logements. Comme cela avait été le cas au cours des deux années précédentes, c'est le marché des logements existants qui a soutenu la demande de crédit hypothécaire en 1984. Les prêts hypothécaires ont particulièrement augmenté au premier semestre de l'année en dépit de la hausse des taux d'intérêt. Il semble que les anticipations de nouvelles hausses des taux hypothécaires aient modifié le profil de la demande de crédit hypothécaire, entraînant une progression du volume des prêts entre avril et juin et un ralentissement au second semestre.

Les banques à charte ont été les institutions les plus actives sur le marché des prêts hypothécaires en 1984. Au premier semestre, alors que le marché se portait quand même relativement bien, elles ont réduit l'écart entre les taux de leurs prêts hypothécaires et les taux de leurs certificats de placement garantis et ont octroyé environ 50 % des nouveaux prêts. Ces institutions ont en général intensifié leurs activités sur les marchés hypothécaires en offrant, comme plusieurs de leurs concurrents l'avaient déjà fait, des modalités plus souples de renouvellement et de remboursement des emprunts.

banks made their mortgage loans more attractive to borrowers by introducing more flexible mortgage renewal and repayment terms, as some of their competitors had already done.

Government borrowing

Public sector borrowing in 1984 remained relatively high by earlier standards, even though it was about \$2 billion lower than the 1983 level (see Table V). As a proportion of GNP, government borrowing dropped to 9.0 per cent from 10.2 per cent in 1983, though it was still at a higher level than the 7.7 per cent average during the 1975-81 period. Borrowing by the public sector also fell in relation to total funds raised. This reduction was largely at the provincial and municipal level where credit demands declined from \$13.8 billion in 1983 to \$11.5 billion in 1984, reflecting a \$2 billion reduction in their budget deficits.*

New federal government borrowing remained at about \$26 billion while the budget deficit rose significantly from \$24.1 billion to \$29.6 billion, mainly as a result of an increase in debt servicing costs. In addition to its new borrowing, the government also financed its deficit by reducing its cash balances by \$3.6 billion.

Marketable bonds issued in 1984 by provincial and municipal authorities decreased by 22 per cent from their 1983 level, while federal government issues of marketable bonds rose by 53 per cent to \$11 billion. Treasury bills issued by the federal government, in contrast, fell from their record high level of \$13.3 billion to \$10.7 billion. In the second and third quarters of 1984, the federal government used in part the proceeds from the sales of securities and in part its cash balances to meet the heavy demand for funds resulting from the unusually high volume of Canada Savings Bond encashments.

Types and sources of financing

As mentioned previously, not only was the demand for credit relatively strong compared with the previous two years, but there was also a significant shift in the way it was financed (Chart VI). From 1975 to 1981, new borrowing was split almost evenly between loans and securities. Reflecting the reduction in consumer credit, the restructuring of business balance sheets and the sharp increase in government borrowing, almost all funds raised by non-financial borrowers in 1982

Financement obtenu par les gouvernements

Le montant des emprunts du secteur public est demeuré relativement élevé en 1984, bien qu'il ait diminué d'environ 2 milliards de dollars par rapport à 1983 (voir Tableau V). Le rapport de ce financement au PNB, qui était de 10,2 % en 1983, est passé à 9,0 %, se maintenant à un niveau supérieur à la moyenne de 7,7 % enregistrée durant la période 1975-1981. La part du secteur public dans l'ensemble du financement a aussi diminué. Ce ralentissement s'explique par la baisse des emprunts des provinces, des municipalités et de leurs entreprises, qui sont passés de 13,8 milliards en 1983 à 11,5 milliards de dollars en 1984 par suite de la réduction de 2 milliards de dollars du déficit budgétaire de ces administrations gouvernementales*. Le chiffre des nouveaux emprunts du gouvernement fédéral s'est maintenu aux environs de 26 milliards de dollars, alors que le déficit s'est sensiblement accru, passant de 24,1 milliards à 29,6 milliards de dollars, sous l'effet notamment de l'augmentation du service de la dette. La principale raison qui explique le maintien des emprunts du gouvernement sous le niveau de son déficit a été la diminution de ses dépôts d'environ 3,6 milliards de dollars.

En 1984, les émissions d'obligations négociables des provinces et des municipalités ont été réduites de 22 % par rapport à 1983 alors que celles du gouvernement fédéral ont augmenté de 53 % pour atteindre 11 milliards de dollars. Par rapport à 1983, on note également une diminution des émissions de bons du Trésor, qui sont tombées du niveau record de 13,3 milliards de dollars à 10,7 milliards de dollars. Au cours du deuxième et du troisième trimestres de 1984, le gouvernement fédéral a utilisé une partie du produit des émissions de titres et une partie de ses dépôts pour faire face aux sorties de fonds considérables engendrées par les remboursements inhabituels d'obligations d'épargne du Canada.

Types et sources de financement

Comme il a été mentionné précédemment, la demande de crédit a été assez forte par rapport aux deux années précédentes, et la structure de l'endettement s'est aussi considérablement modifiée (voir Graphique VI). Entre 1975 et 1981, les prêts et les émissions de titres représentaient une proportion à peu près équivalente du financement total. Par suite du ralentissement des prêts personnels, de la restructuration du bilan des entreprises et de l'augmentation des emprunts des gouvernements, la quasi-totalité du financement avait été obtenue en 1982 et en 1983 par voie d'émission de titres. En 1984, les prêts au secteur privé ont représenté plus de 27 % du financement total, soit une augmentation de 17,6 milliards de dollars, alors que les émissions de titres diminuaient de 8,3 milliards†. La diminution des émissions de titres à court terme reflète surtout la

* Les données sur le déficit des administrations gouvernementales proviennent des comptes nationaux.

† Les émissions de titres comprennent les émissions nettes de titres négociables libellés en dollars canadiens et en devises étrangères, les obligations d'épargne du Canada ainsi que les titres achetés avec des fonds du Régime de pensions du Canada.

Note: To obtain a total of combined federal, provincial and municipal financing without double counting, loans from the Government of Canada to the provinces and municipalities shown above would have to be eliminated, as well as changes in provincial and municipal holdings of Government of Canada securities.

(1) Foreign currency issues are converted to Canadian dollars at the average noon exchange rate during the month in which the funds were raised.

(2) This item includes transactions involving term loans.

(3) Actual drawings and repayments are denominated in U.S. dollars. The amounts shown are converted to Canadian dollars at the average noon exchange rate during the month in which the funds were drawn or repaid. Owing to fluctuations in the exchange value of the Canadian dollar, drawings and repayments of equivalent U.S. dollar amounts will not necessarily net to zero.

(4) Excludes changes in cash balances resulting from temporary swap transactions between the Bank of Canada and the Exchange Fund Account.

(5) Includes government enterprises.

(6) Includes provincial savings bonds and purchases of provincial and municipal securities with Quebec Pension Plan funds. Excludes Canadian dollar issues placed in overseas markets, which are included with foreign currency bonds.

(7) Includes loans from foreign banks located abroad and the Canadian chartered banks.

(8) This item has been revised to include certain provinces and municipalities not previously captured in our survey and also provincial treasury bills and paper sold directly to banks which had previously been classified as bank loans.

(9) To the extent that it has not been possible to identify purchases by provincial government accounts of provincial or municipal securities, the total of provincial and municipal financing is overstated.

Nota : Pour établir le montant net, c'est-à-dire sans double emploi, du financement obtenu par l'ensemble du secteur public, il faudrait éliminer des données ci-dessus les prêts du gouvernement canadien aux provinces et aux municipalités, ainsi que les variations des portefeuilles des provinces et des municipalités en titres du gouvernement canadien.

(1) Le montant des émissions en monnaies étrangères est converti en dollars canadiens au taux de change moyen à midi du mois au cours duquel les fonds ont été empruntés.

(2) Ce poste tient compte des opérations donnant lieu à des emprunts à terme.

g) Les tirages et les remboursements effectués sont exprimés en dollars É.-U. Les montants indiqués sont convertis en dollars canadiens au taux de change moyen à midi du mois au cours duquel les fonds ont été tirés ou remboursés. À cause des variations du cours du dollar canadien, la différence entre les tirages et les remboursements auxquels donnent lieu des emprunts de même montant libellés en dollars É.-U. n'est pas nécessairement égale à zéro.

(4) Non compris les variations des dépôts consécutives aux opérations temporaires de swap conclues entre la Banque du Canada et le Fonds des changes.

⁽¹⁵⁾ Y compris les entreprises du secteur public.

(6) Y compris les obligations d'épargne des provinces et les titres des provinces et des municipalités achetés avec des fonds du Régime des rentes du Québec. En sont exclues les émissions de titres en dollars canadiens placées sur les marchés d'outre-mer et qui sont groupées avec les obligations en monnaies étrangères.

(8) Cette rubrique a été modifiée de façon à inclure certaines provinces et municipalités qui n'étaient pas

⁽⁹⁾ Dans la mesure où il n'a pas été possible de recenser toutes les acquisitions de titres des provinces et des municipalités par les provinces, ce montant est surestimé.

* Includes all Canadian dollar and foreign currency securities and Canada Savings Bonds.

* Comprend tous les titres en dollars canadiens et en monnaies étrangères, ainsi que les obligations d'épargne du Canada.

and 1983 were obtained through the issue of securities. In 1984, however, funds raised through loans and mortgages represented more than 27 per cent of total financing, an increase of \$17.6 billion, while long- and short-term security issues declined by \$8.3 billion.* The decrease in treasury bills accounted for the smaller volume of short-term securities, while the decreasing volume of common shares issued by business and a lessening of the financing requirements of provinces and municipalities, accounted for the decline in long-term securities issued.

During 1984, the recovery in demand for commercial and consumer loans by businesses and households significantly increased the credit extended by deposit-taking institutions.† In fact, the percentage of total

baisse des émissions de bons du Trésor. Quant au financement à long terme, il a diminué par suite, d'une part, du ralentissement des émissions d'actions ordinaires des entreprises et, d'autre part, de la réduction des besoins financiers des provinces et des municipalités.

Au cours de l'année 1984, particulièrement en raison de la reprise de la demande de prêts commerciaux et de la demande de prêts à la consommation, les institutions financières de dépôt ont sensiblement accru leurs opérations de crédit*. En fait, la proportion du financement total obtenu par l'intermédiaire de ces institutions, qui avait fortement diminué en 1982, a continué d'augmenter en 1984, se maintenant cependant en deçà de la proportion moyenne des années 1975-1981. En 1984, la part relative des institutions parabancaires dans le financement des différents secteurs a légèrement diminué tandis que la part des banques à charte, après le net recul des deux années précédentes, a augmenté significativement. Ces dernières ont surtout profité de l'augmentation de la demande de prêts commerciaux et ont aussi intensifié leurs activités

* Security issues include net marketable issues denominated in Canadian and foreign currencies, Canada Savings Bonds as well as securities purchased with Canada Pension Plan funds.

† Deposit-taking institutions include chartered banks as well as some non-bank financial institutions, such as trust and mortgage loan companies, and credit unions and caisses populaires.

* Les institutions de dépôt comprennent les banques à charte ainsi que certaines institutions parabancaires telles que les sociétés de fiducie ou de prêt hypothécaire ainsi que les caisses populaires et *credit unions*.

financing raised through these financial intermediaries, which had dropped sharply in 1982, continued to rise throughout 1984 although it remained below the overall average for the 1975-81 period. In 1984, the relative share of non-bank financial institutions in the total credit provided to Canadian borrowers decreased slightly. On the other hand, the share of chartered banks rose significantly after the net decline in the previous two years; with the rise in demand for commercial loans and their more aggressive role in the mortgage market, the banks attracted over half of the new loans, a similar proportion to that maintained through the second half of the 1970s. In order to meet this loan demand, chartered banks competed for deposits by offering more attractive interest rates to their customers, particularly on personal term deposits.

In the light of the pickup in loan demand, deposit-taking institutions as a whole considerably reduced their net purchases of securities. These institutions bought a little less than 9 per cent of new issues of market securities in 1984 in contrast to the more than 20 per cent they purchased in 1983. Of the deposit-taking institutions, the banks expanded their holdings of securities by only \$2.2 billion in 1984, in contrast to \$5.9 billion in 1983. For instance, banks sold off \$580 million of treasury bills compared with their purchases of \$3.3 billion in 1983. Other deposit-taking institutions increased their holdings of marketable securities, especially those of federal and provincial governments, at a slower pace than in 1983. Contractual-savings institutions such as life insurance companies, however, significantly raised the proportion of public-sector securities in their portfolios while their mortgage loans tended to decline. Life insurance companies appear to have attracted additional household savings as a result of the growing popularity of their annuities and their universal life policies. Moreover, non-residents in 1984 provided a greater share of total financing by Canadian borrowers, mainly through larger holdings of federal government securities.

sur le marché hypothécaire, de sorte qu'elles ont octroyé plus de la moitié des nouveaux prêts, soit une proportion à peu près équivalente à celle observée durant la seconde moitié des années soixante-dix. Pour financer une partie de ces prêts, les banques se sont efforcées d'accroître leurs dépôts en offrant à leurs clients des taux plus attractifs, notamment sur les dépôts à terme des particuliers.

Devant la reprise de la demande de prêts du secteur privé, l'ensemble des institutions de dépôt ont considérablement ralenti leurs acquisitions nettes de titres. Après avoir acheté en 1983 plus de 20 % des titres négociables nouvellement émis, ces institutions en ont acheté à peine 9 % au cours de 1984. Le portefeuille de titres des banques à charte, qui avait augmenté de 5,9 milliards de dollars en 1983, ne s'est accru que de 2,2 milliards en 1984. Les banques ont vendu pour 580 millions de dollars de bons du Trésor, ce qui contraste nettement avec les achats de 3,3 milliards effectués en 1983. Le volume des titres négociables, spécialement ceux des administrations fédérales et provinciales, détenus par les autres institutions de dépôt s'est aussi accru à un rythme moins rapide qu'en 1983. Cependant, certaines institutions d'épargne contractuelle, telles que les compagnies d'assurance-vie, ont augmenté considérablement la quantité de titres publics dans leur portefeuille alors que leurs prêts hypothécaires avaient tendance à diminuer. Il semble que les compagnies d'assurance-vie ont accaparé une partie additionnelle de l'épargne des ménages grâce à la popularité grandissante de leurs régimes de rentes individuelles et de leur police universelle. Notons finalement qu'une plus grande proportion du financement a été assurée par les non-résidents, lesquels ont accru surtout leurs achats de titres fédéraux.

(1) These data include loans made by bank mortgage subsidiaries and institutions affiliated with foreign banks.

Most of these latter institutions became chartered banks in the last half of 1981 and the first half of 1982.

(2) Includes credit extended by department stores.

(3) Includes loans from Quebec savings banks, investment funds, property and casualty insurance companies, real estate investment trusts and the Federal Business Development Bank.

(4) Includes net new issues of government and non-financial business.

(5) Includes foreign currency issues placed in Canada.

(6) Includes Canadian dollar issues placed abroad.

(7) Includes holdings of foreign currency securities issued by Canadian borrowers.

(8) Includes Quebec Pension Plan.

(9) Includes both foreign currency and Canadian dollar securities acquired by non-residents, direct investment from abroad, and syndicated loans from foreign banks located abroad.

(1) Ces données comprennent les prêts octroyés par les filiales hypothécaires des banques et par les institutions affiliées à des banques étrangères. La plupart de ces institutions ont obtenu le statut de banque à charte au dernier semestre de 1981 ou au premier semestre de 1982.

(2) Comprend le crédit octroyé par les grands magasins.

(3) Comprend les banques d'épargne du Québec, les fonds de placement, les sociétés d'assurance-biens et d'assurance contre des risques divers, les sociétés fiduciaires de placement immobilier et la Banque fédérale de développement.

(4) Comprend le montant net des nouveaux titres émis par les gouvernements et les entreprises non financières.

(5) Y compris les titres en monnaies étrangères placés au Canada.

(6) Y compris les émissions en dollars canadiens placées sur les marchés étrangers.

(7) Y compris les titres en monnaies étrangères émis par des emprunteurs canadiens.

(8) Y compris le Régime des rentes du Québec.

(9) Y compris les titres en monnaies étrangères et en dollars canadiens achetés par les non-résidents, les investissements directs des non-résidents et les prêts consortiaux de banques étrangères établies à l'étranger.

Statement by John W. Crow Senior Deputy Governor of the Bank of Canada

to the House of Commons

Standing Committee on Miscellaneous Estimates —

Hearings on a circulating dollar coin

15 April 1985

We are pleased to have this opportunity to meet with you. Let me say at the outset that we think that the idea of introducing a one dollar circulating coin is one that deserves serious consideration. There are potential cost savings for the federal Government and a range of advantages and costs for the private sector. Before commenting on questions concerning the relationship between a circulating dollar coin and the dollar note I will describe briefly the Bank of Canada's role in the issue and management of currency.

The Bank has the responsibility under its Act to supply the banknotes required for circulation in Canada and to make arrangements for their issue. The form and material of the notes are subject to the approval of the Minister of Finance while the particular denominations to be issued are determined by regulation of the Governor in Council. At present there are eight denominations, from \$1 through \$1,000.

The notes are printed under contract by two Canadian security printing companies on paper supplied by a Canadian company. Banknotes are put into circulation through financial institutions across Canada. One dollar notes account for a major share of the total volume of banknote operations effected by the Bank, although they make up a small fraction of the total value of banknotes in circulation. In 1984 some 725 million new notes were issued, of which close to 300 million were one dollar notes, and a somewhat lesser number of worn notes were withdrawn and destroyed. Additional data are provided in the appendix.

Déclaration faite par John W. Crow Premier sous-gouverneur de la Banque du Canada

devant le Comité permanent des

prévisions budgétaires en général

de la Chambre des communes

*Audiences sur l'émission d'une pièce de monnaie de 1 dollar destinée à la circulation
le 15 avril 1985*

C'est avec plaisir que nous participons à la séance de travail d'aujourd'hui. Permettez-moi de vous dire tout de suite que l'idée d'émettre une pièce de 1 dollar destinée à la circulation mérite d'après nous d'être étudiée sérieusement. Elle offre au gouvernement fédéral la possibilité de réduire certains coûts et elle implique pour le secteur privé à la fois des avantages et des coûts. Avant d'aborder la question de la relation existant entre une pièce de 1 dollar et le billet de 1 dollar, je décrirai brièvement le rôle que joue la Banque du Canada dans l'émission et la gestion de la monnaie.

Aux termes de sa loi constitutive, la Banque du Canada a pour mission de fournir les billets de banque nécessaires au fonctionnement de l'économie canadienne et de voir à l'émission de ces billets. La forme et la matière des billets doivent être approuvées par le ministre des Finances, tandis que le choix des coupures à émettre fait l'objet d'un règlement du Gouverneur en conseil. Il existe à l'heure actuelle huit coupures qui vont de 1 à 1000 dollars.

Les billets sont imprimés par deux sociétés canadiennes d'impression de titres, avec lesquelles la Banque a signé des contrats à cet effet, sur du papier fourni par une entreprise canadienne. Les billets de banque sont mis en circulation par l'intermédiaire du réseau d'institutions financières du pays. Une part importante des opérations sur billets de banque qu'effectue la Banque du Canada porte sur les billets de 1 dollar, bien que ceux-ci ne constituent qu'une petite fraction de la valeur des billets en circulation. En 1984, quelque 725 millions de billets neufs ont été émis, dont près de 300 millions en billets de 1 dollar, et un nombre un peu plus petit de billets usés ont été retirés de la circulation et détruits. On trouvera d'autres données sur ce sujet dans les tableaux de l'annexe.

The Bank's direct involvement with coinage is very limited. Our Agencies receive orders for new coins from financial institutions, but these orders are simply relayed to the Mint which arranges for delivery directly to the institutions. Our Agencies also receive reports on surplus coin held by the institutions, which again are relayed to the Mint. The Bank of Canada does not accept deposits of surplus circulating coin held by financial institutions, and we have not therefore designed our Agency facilities for such an operation. Our Agencies do, however, receive the relatively small amounts of mutilated coin that institutions need to dispose of and forward them to the Mint for redemption. Finally, I should note that under Section 208 of the Bank Act banks' holdings of circulating coin with a face value of \$2 or less are eligible for inclusion in the cash reserves that they are required to hold against their deposit liabilities.

With this background let me now turn to the questions before the Committee insofar as they involve the Bank of Canada.

I indicated above that there are potential cost savings for the federal Government from the introduction of a circulating one dollar coin.

If the increase in coins is offset by an approximately equal decline in the circulation of one dollar notes, savings originate essentially in the fact that a dollar coin, although costing more to produce per unit than a banknote, would stay in circulation indefinitely whereas a dollar note has to be reproduced for circulation approximately every year. Thus one can compare the once-for-all costs of producing a dollar coin against the stream of costs over time of maintaining a dollar note in circulation. The net savings for the federal Government on this score, after recovering the once-for-all costs of minting new coins and depending on those costs of minting, could apparently amount to some millions of dollars a year.

The amount of saving and the manner in which it accrued to the federal Government would of course also depend importantly on the public's demand for the one dollar coin relative to other forms of currency. For example, if the one dollar note were to be phased out some part of the demand would likely shift to two dollar notes rather than to a one dollar coin. Furthermore, hoarding and numismatic demand for coin could be a significant source of revenue. In addition, in the event that the dollar note was phased out, not all such notes would be returned to the Bank of Canada.

As regards possible implications for the private sector, the Bank is broadly aware of the range of issues, the perceived advantages in some areas and the apparent drawbacks in others, that are involved. In this

La participation directe de la Banque dans le monnayage est très limitée. Les institutions financières commandent des pièces neuves auprès de nos Agences; ces commandes sont simplement transmises à la Monnaie Royale, qui s'occupe de faire livrer les pièces demandées aux institutions concernées. Nos Agences reçoivent également des relevés sur les surplus de pièces détenues par les institutions, lesquels sont aussi acheminés à la Monnaie Royale. La Banque du Canada n'accepte pas les dépôts de pièces de monnaie détenues en surplus par les institutions financières, de sorte que les installations de nos Agences n'ont pas été conçues pour ce genre d'opérations. Toutefois, nos Agences acceptent des petites quantités de pièces mutilées dont les institutions financières veulent se débarrasser et les renvoient à la Monnaie Royale, qui les rachète. Enfin, j'aimerais faire remarquer que l'article 208 de la *Loi sur les banques* stipule que les pièces de monnaie ordinaires d'une valeur nominale de 2 dollars ou moins peuvent être comprises dans les réserves-encaisse que les banques doivent détenir en contrepartie de leur passif-dépôts.

Ceci dit, j'aimerais aborder maintenant les questions sur lesquelles se penche le Comité et examiner surtout les aspects qui concernent la Banque du Canada.

J'ai mentionné précédemment que la mise en circulation d'une pièce de 1 dollar était de nature à permettre une diminution des coûts pour le Gouvernement fédéral.

Si l'accroissement de la quantité des pièces de monnaie est compensé par une diminution à peu près égale du volume de billets de 1 dollar en circulation, l'économie réalisée est essentiellement attribuable au fait qu'une pièce de 1 dollar, qui coûte il est vrai plus cher à produire qu'un billet de banque, peut rester en circulation indéfiniment, tandis qu'un billet de 1 dollar doit être remplacé à peu près chaque année. On peut donc comparer le coût définitif de production d'une pièce de 1 dollar avec les coûts successifs qu'entraîne à la longue le maintien en circulation d'un billet de 1 dollar. Les économies nettes réalisées par le gouvernement fédéral, après l'amortissement des frais de monnayage encourus en une seule fois et compte tenu de l'importance de ces frais, totaliseraient semble-t-il quelques millions de dollars par année.

Le montant des économies et la façon dont le gouvernement fédéral les réaliserait dépendraient bien sûr aussi, et dans une large mesure, de la demande du public pour les pièces de 1 dollar comparativement à la demande pour d'autres formes de monnaie. Par exemple, si le billet de 1 dollar devait être retiré graduellement de la circulation, une partie de la demande serait probablement satisfaite par des billets de 2 dollars plutôt que par des pièces de 1 dollar. De plus, la thésaurisation et la demande de pièces par des collectionneurs pourraient constituer des sources de revenus considérables. En outre, si les billets de 1 dollar étaient retirés graduellement de la circulation, ils ne retourneraient pas tous à la Banque du Canada.

En ce qui a trait aux implications possibles qu'aurait la production de pièces de 1 dollar pour le secteur privé, la Banque est consciente des questions qui se posent, des

regard, and more generally, the Bank has been contributing to the discussions and investigations of the interdepartmental group that has been examining matters related to a circulating dollar coin. However, while the Committee will no doubt be interested in gauging the balance of cost or of benefit to the private sector of introducing a dollar coin, the Bank is not in a position at this time to make such an estimate.

A decision to introduce a dollar coin with the intention of having it circulate extensively inevitably raises important questions about whether the one dollar note should continue to be issued. However, a decision to withdraw the dollar note does not necessarily imply that it should be eliminated immediately. One cost to the private sector would be the transitional cost of adjusting to a new coin, and it might take the general public some time to become accustomed to it. One implication of this is that it might be advisable to have the note and a coin circulate alongside each other at least for some limited time after a coin was introduced.

In conclusion, I would like to note that the Bank, like other parties with a direct involvement in this matter, can use as much advance notice as possible of any change in order to effect as smooth an adjustment as possible in its operations.

Thank you, Mr. Chairman. The Bank is happy to supply whatever further information it can to help the Committee in its deliberations, and we would be pleased to answer any questions.

avantages prévus dans certains domaines et des inconvénients apparents dans d'autres. À cet égard, et sur un plan plus général, la Banque participe depuis quelque temps aux discussions et aux travaux de recherches du groupe interministériel qui étudie les questions liées à la mise en circulation d'une pièce de 1 dollar. Toutefois, bien que le Comité soit sans doute intéressé à évaluer l'incidence nette que la mise en circulation d'une pièce de 1 dollar aura pour le secteur privé, la Banque n'est pas en mesure d'effectuer pour l'instant une telle estimation.

La décision de lancer une pièce de 1 dollar avec l'intention de la faire circuler sur grande échelle soulève inévitablement d'importantes questions à propos de la poursuite de l'émission du billet de 1 dollar. Toutefois, la décision de retirer de la circulation la coupure de 1 dollar ne signifierait pas nécessairement que les billets de 1 dollar devraient être éliminés immédiatement. Le processus d'ajustement à une nouvelle pièce constituerait un coût pour le secteur privé, et il se peut que le public ait besoin de quelque temps pour s'habituer à la nouvelle pièce. Aussi serait-il peut-être souhaitable, si l'on décide de frapper une pièce de 1 dollar, de la faire circuler pendant au moins quelque temps parallèlement au billet de 1 dollar.

Je voudrais mentionner, en guise de conclusion, que la Banque, comme les autres parties en cause, souhaiterait être avisée de tout changement le plus tôt possible afin de procéder avec le moins d'à-coups possible aux ajustements qui s'imposeront.

Monsieur le président, je vous remercie. La Banque se fera un plaisir de fournir au Comité tous les renseignements dont elle dispose et qui aideront celui-ci dans ses délibérations. Nous serons heureux de répondre à toutes les questions que vous voudrez nous poser.

Record of press releases

Major press statements issued by the Bank of Canada and selected other official releases of related interest are published below.

Bank of Canada

15 March 1985

The Bank of Canada announced today a change in the printing process for five-dollar banknotes identical to the change made last year for one-dollar and two-dollar notes in order to reduce printing costs. The face of the five-dollar note will continue to be printed using the intaglio steel engraved process combined with lithography but the back of these notes will now be printed using only lithographic and letterpress processes.

This change does not affect the appearance or texture of the five-dollar notes in any appreciable way.

Five-dollar banknotes printed in this manner will begin to be issued in April.

The printing or publishing of a likeness of current banknotes is prohibited by Section 415 of the Criminal Code of Canada.

Department of Finance

22 March 1985

Signing of U.S.\$500 million Eurobond issue is announced

The Honourable Michael Wilson, Minister of Finance, announced today the signing of an agreement for a Government of Canada U.S.\$500 million public offering of notes in the Eurobond market. Details of this financing were initially made public on 6 March 1985.

The notes, which have a term of 5 years and bear annual coupons of 11 1/2 per cent, have been priced at par. The notes are non-callable until maturity on March 22, 1990. This offering was made through an international syndicate of banks and investment dealers headed by Deutsche Bank AG, Credit Suisse First Boston Limited, Orion Royal Bank Limited and Wood Gundy Inc.

Mr. Wilson noted that part of the proceeds of this financing will replace reserves that were used to redeem a Swiss Franc 500 million note issue (about U.S.\$183 million) which matured on March 14, 1985. The balance of the proceeds will be added to Canada's official holdings of international reserves.

Mr. Wilson also announced that subsequent to the offering of the notes, the annual fixed rate interest costs of the issue were swapped into variable interest rate costs based off the 3-month London Interbank Offered Rate (LIBOR). In effect the total annual cost of the notes of about 12.02 per cent (including commissions) has been converted into a variable quarterly interest rate cost of 3-month LIBOR less a margin of about 50 basis points, or about 8.81 per cent at current levels. This transaction is designed to reduce the total interest charges associated with the notes.

Communiqués reproduits à titre documentaire

On trouvera sous cette rubrique certains communiqués importants publiés par la Banque du Canada ou par d'autres organismes officiels.

Banque du Canada

le 15 mars 1985

La Banque du Canada informe le public que les billets de cinq dollars seront dorénavant imprimés selon le procédé utilisé depuis l'an dernier dans la production des billets de un et de deux dollars, et ce afin de réduire les coûts d'impression des billets. L'impression du recto des billets de cinq dollars continue de faire appel au procédé fondé sur la gravure en taille-douce sur acier ainsi qu'à la lithographie; toutefois, l'impression du verso est maintenant faite exclusivement suivant les procédés lithographiques et typographiques.

Cette modification du mode d'impression ne change de façon appréciable ni l'aspect ni la texture du billet de cinq dollars.

Les billets de cinq dollars imprimés selon ce procédé seront mis en circulation à compter d'avril.

Signature d'une émission d'euro-obligations de É.-U. \$500 millions

Le ministre des Finances, Michael Wilson, a annoncé aujourd'hui la signature d'une entente prévoyant l'offre publique de É.-U. \$500 millions de billets du gouvernement du Canada dans le marché des euro-obligations. Les détails relatifs à cet emprunt ont été rendus publics le 6 mars dernier.

Les billets, qui ont un terme de cinq ans et offrent des coupons d'intérêt annuel à 11 1/2 pour cent, sont vendus au pair. Ces billets ne sont pas remboursables par anticipation jusqu'à leur échéance le 22 mars 1990. Ils sont offerts par l'entremise d'un consortium international de banques et de courtiers en valeurs mobilières dirigé par la Deutsche Bank AG, Crédit Suisse First Boston Limited, Orion Royal Bank Limited et Wood Gundy Inc.

M. Wilson a précisé qu'une partie du produit de cet emprunt servira à remplacer les réserves employées au rachat d'une émission de billets de 500 millions de Francs suisses (environ É.-U. \$183 millions) venue à échéance le 14 mars 1985. Le solde du produit sera ajouté aux réserves officielles de liquidités internationales du Canada.

M. Wilson a également annoncé qu'à la suite de l'offre de billets, les coûts annuels à taux d'intérêt fixes ont été transformés par crédit croisé en coûts à taux d'intérêt variables fondés à partir du taux interbanque de Londres (LIBOR) à 3 mois. En fait, le coût annuel total des billets, d'environ 12.02 pour cent (commissions comprises), a été converti en un coût à taux d'intérêt trimestriel variable égal à LIBOR à 3 mois moins une marge d'environ 50 centièmes, ou environ 8.81 pour cent aux niveaux courants. Cette opération est conçue de façon à réduire la somme des frais d'intérêt afférents à ces billets.

Department of Finance

22 March 1985

Canada renegotiates U.S.\$3.5 billion revolving credit agreement with Canadian banks

The Honourable Michael Wilson, Minister of Finance, today announced a number of amendments to the U.S.\$3.5 billion revolving standby credit agreement with a group of Canadian chartered banks that has been in place since 27 December 1977. This action follows similar amendments to Canada's U.S.\$4 billion revolving standby credit facility with international banks, announced on 11 January 1985.

The amendments to the agreements with the Canadian chartered banks will provide Canada with more favourable terms including a reduced commitment fee and more flexible, lower-cost borrowing options. The maturity date of the agreement has also been extended from 29 June 1991 to 22 March 1995.

The commitment fee payable on the unused portion of the line has been reduced to 1/8 of 1 per cent per annum from 1/5 of 1 per cent per annum. The lower commitment fee will result in savings of up to U.S.\$2.6 million per annum for Canada, depending on the use made of the facility. The amendments also provide for a new competitive bid option which is expected to reduce Canada's borrowing costs when the credit facility is used. Under this option, all of the chartered banks in the loan facility may, at their discretion, bid for a participation in a planned borrowing with the competition leading to lower borrowing costs for Canada. The notice period for this type of advance is four days.

The total amount that may be borrowed by Canada remains unchanged at U.S.\$3.5 billion, but the U.S.\$400 million limit on the amount that can be borrowed on any one day has been increased to U.S.\$700 million. The amendments also provide Canada with the options to draw funds at a spread of 3/8 of 1 per cent over the U.S. dollar Certificate of Deposit (CD) rate as well as at the U.S. prime rate, with no margin, in addition to the option of drawing funds at the London Interbank Offered Rate (LIBOR) plus 1/4 of 1 per cent. These spreads are available for usage of up to 50 per cent of the credit facility. For borrowings in excess of 50 per cent, the relevant spreads increase by 1/8 of 1 per cent. The notice period for LIBOR-based advances has been reduced from four to three days. A three day notice period will also apply to prime and CD-based advances.

The revised agreement also permits Canada to borrow up to U.S.\$1 billion from a subset of the participating chartered banks on one day's notice for a maximum term of 14 days. Under this "Swing Line", Canada can obtain funds at the U.S. prime rate or at IBOR plus a spread of 1/8 of 1 per cent, IBOR being defined as the rate at which the major banks are prepared to offer deposits in U.S. dollars to prime banks in the Toronto interbank market.

"With the completion of the amendments to Canada's two revolving standby credit facilities", Mr. Wilson said, "the Government of Canada will be able to manage its international reserves in a more flexible and cost-effective manner."

Ministère des Finances

le 22 mars 1985

Le Canada renégocie la ligne de crédit renouvelable de É.-U. \$3.5 milliards auprès des banques à charte canadiennes

Le ministre des Finances, l'honorable Michael Wilson, a annoncé aujourd'hui un certain nombre de modifications de la ligne de crédit renouvelable de É.-U. \$3.5 milliards, établie auprès d'un groupe de banques à charte canadiennes le 27 décembre 1977. Cette mesure fait suite à des modifications analogues apportées le 11 janvier 1985 à la ligne de crédit de É.-U. \$4 milliards consentie au Canada par un groupe de banques internationales.

Les modifications apportées à l'entente conclue avec les banques à charte canadiennes offriront au Canada des modalités plus favorables, dont une commission d'engagement réduite ainsi que des conditions d'emprunt plus souples et à meilleur marché. L'échéance de l'entente a également été prolongée du 29 juin 1991 au 22 mars 1995.

La commission d'engagement payable sur la partie inutilisée de la ligne de crédit a été réduite à 1/8 de 1 pour cent de 1/5 de 1 pour cent par an. La commission d'engagement réduite permettra au gouvernement du Canada de réaliser une épargne allant jusqu'à É.-U. \$2.6 millions par année, selon l'usage qu'il fera de la ligne de crédit. Les modifications permettront également un nouvel octroi d'avances concurrentielles qui devraient réduire les coûts d'emprunt du Canada lors de ses tirages sur la ligne. Cette disposition prévoit que les membres du consortium pourront faire à leur gré une offre de participation à un emprunt prévu, la concurrence prenant les devants pour réduire les coûts d'emprunt au Canada. La période de préavis pour ce genre d'avance sera de quatre jours.

Le maximum que pourra emprunter le Canada demeure inchangé à É.-U. \$3.5 milliards, mais la limite de \$400 millions pouvant être empruntés en une seule journée a été portée à É.-U. \$700 millions. L'entente prévoit également une option d'emprunt avec un écart de 3/8 de 1 pour cent au-dessus du taux des Certificats de dépôts (C.D.), ou du taux préférentiel américain, sans marge, en plus de l'option permettant des tirages au taux interbanque de Londres (LIBOR) plus 1/4 de 1 pour cent. Ces écarts sont disponibles pour les premiers 50 pour cent de la ligne de crédit. Pour les emprunts de plus de 50 pour cent, les écarts prévus augmentent de 1/8 de 1 pour cent. Dans le cas des tirages fondés sur LIBOR la période de préavis a été réduite à trois jours de quatre. Les trois jours de préavis s'appliqueront également dans le cas de tirages fondés sur les taux préférentiel américain et C.D.

L'entente modifiée permet également au Canada d'emprunter jusqu'à É.-U. \$1 milliard d'un sous-groupe du consortium bancaire sur avis d'un jour pour un terme de 14 jours au plus. Dans le cadre de cet arrangement dit « Swing Line » le Canada pourra obtenir des fonds au taux préférentiel américain ou au taux IBOR plus 1/8 de 1 pour cent, IBOR étant défini comme le taux que les principales banques sont disposées à offrir sur les dépôts en dollars américains aux grandes banques du marché interbancaire de Toronto.

« Ces modifications aux deux lignes de crédit renouvelables étant en place, le Canada sera en mesure de gérer ses réserves officielles de liquidités internationales de manière plus souple et efficace, » a affirmé M. Wilson.

Department of Finance

25 March 1985

Support package to ensure viability of Canadian Commercial Bank

The Honourable Barbara McDougall, Minister of State for Finance, announced today that a joint agreement has been reached to ensure the long-term viability of the Canadian Commercial Bank. Parties to the agreement, which involves an infusion of capital with repayment provisions, include the Province of Alberta, six Canadian chartered banks, Canada Deposit Insurance Corporation and the Government of Canada.

The support package is designed to provide the Canadian Commercial Bank with sufficient funds to ensure solvency following a recent and sharp deterioration in its U.S. loan portfolio.

The agreement will result in the purchase by the support group of a package of non-performing loans. This transaction will leave the bank in a strong position of solvency in order to support its deposit base.

Representatives of the Canadian Commercial Bank notified the Office of the Inspector General of Banks on 14 March 1985, that the deterioration in its loan portfolio could place the bank in a position whereby it could be unable to meet its obligations to depositors and creditors.

Following analysis of the Canadian Commercial Bank's position, the Inspector General of Banks determined that an infusion of additional funds in the amount of \$255 million would ensure that the bank could continue to play a key role in the western Canadian economy.

A restructuring package initiated by the Canadian Commercial Bank was negotiated by the Inspector General of Banks with the parties to the agreement.

The CDIC, which is funded by member deposit-taking institutions, will provide \$75 million. The remaining \$180 million will be shared equally by the Province of Alberta, the banking group and the Government of Canada in the amount of \$60 million each.

The repayment program calls for the Canadian Commercial Bank to pay 50 per cent of its future pre-tax profits to the participating institutions until the capital is repaid in full. The remaining 50 per cent will be retained by the bank. No common or preferred share dividends will be paid until the repayment program is complete. As part of the transaction, members of the support group will be entitled to receive warrants and payment of principal and interest on subordinated debt will be postponed.

In a separate arrangement, the governments of Alberta, British Columbia, and Canada will be purchasing up to \$39 million of the subordinated debt.

"I have full confidence that this cooperative support package involving Canada's largest chartered banks and the two governments will permit the Canadian Commercial Bank to continue its active and important role in the growing economy of western Canada", said Minister of State for Finance Barbara McDougall. "I have in addition been assured by Governor Gerald Bouey that as usual the Bank of Canada stands ready to provide liquidity for Canadian Commercial Bank, if requested, as well as for any other Canadian bank."

The Minister concluded, "This support package represents a strong collective vote of confidence in the health of the economy of western Canada."

Ministère des Finances

le 25 mars 1985

Un programme de soutien assurera la viabilité de la Banque commerciale du Canada

Le ministre d'État aux Finances, l'honorable Barbara McDougall, a annoncé aujourd'hui la conclusion d'un accord assurant la viabilité à long terme de la Banque commerciale du Canada. Le gouvernement de l'Alberta, six banques à charte canadiennes, la Société d'assurance-dépôts du Canada et le gouvernement du Canada, sont parties à cet accord comportant une infusion de capital et des dispositions de remboursement.

Le programme de soutien est conçu de manière à fournir suffisamment de fonds à la Banque commerciale pour maintenir sa solvabilité, suite à une détérioration récente et vive de son portefeuille de prêts aux États-Unis.

L'accord prévoit l'achat par le groupe de soutien d'un contrat global de prêts non productifs d'intérêt. Cette opération assurera que la Banque demeurera fermement solvable, lui permettant ainsi de soutenir sa base de dépôts.

Des représentants de la Banque commerciale ont avisé le Bureau de l'Inspecteur général des banques le 14 mars 1985, qu'en raison de la détérioration de son portefeuille de prêt, elle pourrait manquer à ses obligations envers les déposants et créiteurs.

Suite à une analyse de la situation de la Banque commerciale du Canada, l'Inspecteur général des banques a déterminé qu'une infusion de capital de l'ordre de \$255 millions permettrait à la banque de continuer de jouer un rôle clé dans l'économie de l'Ouest canadien.

Un contrat global de restructuration initié par la Banque commerciale a été négocié par l'Inspecteur général des Banques avec les parties à cet accord.

La SADC — financée par les institutions de dépôt membres — fournira \$75 millions. Le gouvernement de l'Alberta, le groupe de banques à charte et le gouvernement du Canada se diviseront les \$180 millions restants en parts égales de \$60 millions.

Le programme de remboursement prévoit que la Banque commerciale versera 50 pour cent de ses bénéfices avant impôt aux institutions participantes et ce, jusqu'à ce que le capital ait été entièrement remboursé. La Banque retiendra les 50 pour cent restants. Aucun dividende ne sera versé sur les actions ordinaires et privilégiées jusqu'à ce que le programme de remboursement ait été satisfait. Dans le cadre de cette opération, les membres du groupe de soutien pourront recevoir des garanties et paiements de principal, et l'intérêt sur la dette subordonnée sera reporté.

Dans le cadre d'un accord distinct, les gouvernements de l'Alberta, de la Colombie-Britannique et du Canada rachèteront jusqu'à \$39 millions de la dette subordonnée.

«Je suis pleinement confiante que ce programme de soutien coopératif regroupant les principales banques à charte du Canada et les pouvoirs publics compétents permettra à la Banque commerciale du Canada de poursuivre son rôle actif et important pour l'économie en essor de l'Ouest canadien,» a affirmé le ministre d'État aux Finances Barbara McDougall. «En outre, j'ai reçu l'assurance du Gouverneur Bouey que la Banque du Canada est disposée, comme toujours, à fournir des fonds à la Banque commerciale du Canada, le cas échéant, ainsi qu'à toute autre banque à charte canadienne».

«Ce programme de soutien constitue un vigoureux vote de confiance collectif à l'égard de la santé de l'économie de l'Ouest du Canada,» a conclu Mme McDougall.

Seasonally adjusted – monthly average of Wednesdays
Données désaisonnalisées – Moyenne mensuelle des mercredis

*Data prior to January 1982 have been adjusted to eliminate major discontinuities in November 1981 in the series resulting from the revision to the Bank Act in 1980 and the introduction of a new statistical reporting system. See articles in Bank of Canada Review November 1981 and March 1983.

Les données antérieures à janvier 1982 ont été corrigées afin d'éliminer les ruptures importantes survenues dans les séries en novembre 1981 par suite de la révision de la Loi sur les banques de 1980 et de l'adoption d'un nouveau système de relevés statistiques. Voir articles publiés dans les livraisons de novembre 1981 et mars 1983 de la Revue de la Banque du Canada.

Statistical tables

The asterisks (*) indicate occasional tables which are published in the K section. Latest publication date is in parentheses.

A. Major financial and economic indicators S 20

- A1 Analytical summary
- A2 Government of Canada fiscal position

B. Bank of Canada S 26

- B1 Bank of Canada: Monthly series
- B2 Bank of Canada: Weekly series
- K1* Bank of Canada: Note liabilities (February 1985)

C. Chartered banks S 30

- C1 Chartered bank selected assets: Weekly series
- C2 Chartered bank selected liabilities: Weekly series
- C3 Chartered bank assets: Monthly series
- C4 Chartered bank liabilities: Monthly series
- C5 Chartered banks: Regional distribution of assets
- C6 Chartered banks: Regional distribution of liabilities
- C7 Chartered banks: Quarterly classification of loans to non-financial corporations and unincorporated businesses by type and size of authorization
- C8 Chartered banks: Quarterly classification of non-mortgage loans
- C9 Selected seasonally adjusted series: Chartered bank assets and liabilities
- C10 Chartered banks: Cash and secondary reserves
- C11 Chartered banks: Total foreign currency assets and liabilities
- C12 Chartered banks: Total foreign currency assets and liabilities booked in Canada
- C13 Chartered banks: U.S. dollar assets and liabilities booked in Canada
- K2* Total Canadian-owned chartered banks: Consolidated statement of revenue and expense (February 1985)
- K3* Total Canadian-owned chartered banks: Consolidated statement of shareholders' equity and appropriations for contingencies (February 1985)

D. Other financial institutions S 60

- D1 Trust and mortgage loan companies: Quarterly statement of estimated assets and liabilities (discontinued)
- D2 Trust and mortgage loan companies excluding bank mortgage subsidiaries

Tableaux statistiques

Les astérisques (*) désignent les tableaux de la section K qui sont publiés à des fréquences variables. La date à laquelle ces tableaux ont été publiés la dernière fois est indiquée entre parenthèses.

A. Principaux indicateurs financiers et économiques S 20

- A1 Principaux indicateurs financiers et économiques : Résumé analytique
- A2 Trésorerie du gouvernement canadien

B. Banque du Canada S 26

- B1 Banque du Canada : Séries mensuelles
- B2 Banque du Canada : Séries hebdomadaires
- K1* Banque du Canada : Passif-billets (Février 1985)

C. Banques à charte S 30

- C1 Banques à charte : Quelques éléments de l'actif — Séries hebdomadaires
- C2 Banques à charte : Quelques éléments du passif — Séries hebdomadaires
- C3 Banques à charte : Actif — Séries mensuelles
- C4 Banques à charte : Passif — Séries mensuelles
- C5 Banques à charte : Répartition régionale de l'actif
- C6 Banques à charte : Répartition régionale du passif
- C7 Banques à charte : Ventilation trimestrielle des prêts aux sociétés non financières et aux entreprises individuelles, par type de prêt et montant autorisé
- C8 Banques à charte : Ventilation trimestrielle des prêts non hypothécaires
- C9 Quelques statistiques bancaires désaisonnalisées : Avoirs et engagements des banques à charte
- C10 Banques à charte : Réserves-encaisse et réserves secondaires
- C11 Banques à charte : Avoirs et engagements en monnaies étrangères
- C12 Banques à charte : Avoirs et engagements en monnaies étrangères comptabilisés au Canada
- C13 Banques à charte : Avoirs et engagements en dollars américains comptabilisés au Canada
- K2* Ensemble des banques à charte à capital canadien : État consolidé des revenus et dépenses (Février 1985)
- K3* Ensemble des banques à charte à capital canadien : État consolidé de l'avoir des actionnaires et des provisions pour éventualités (Février 1985)

D. Autres institutions financières S 60

- D1 Sociétés de fiducie ou de prêt hypothécaire : Situation trimestrielle (estimations) (discontinué)
- D2 Sociétés de fiducie ou de prêt hypothécaire (non compris les filiales hypothécaires des banques à charte)

- D3 Mortgage loan companies associated with chartered banks: Monthly statement of estimated assets and liabilities
- D4 Local credit unions and caisses populaires: Quarterly statement of estimated assets and liabilities
- D5 Quebec savings banks
- K4* Deposits with government savings institutions (February 1985)
- D6 Sales finance and consumer loan companies: Quarterly statement of estimated assets and liabilities
- D7 Sales finance and consumer loan companies: Monthly statement of estimated assets and liabilities
- D8 Canadian investment transactions of sixteen life insurance companies
- K5* Life insurance companies: Assets held in Canada (October 1984)
- D9 Investment dealers: Weekly report on inventories of securities
- D10 Investment funds: Quarterly statement of estimated assets and liabilities
- D11 Closed-end funds: Quarterly statement of estimated assets and liabilities
- D12 Federal Business Development Bank
- K6* Trusteed pension plans (December 1984)

E. Financial aggregates S 78

- E1 Selected indicators of money and credit
- K7* Monetary aggregates and credit measures (February 1985)
- E2 Consumer credit: Outstanding balances of selected holders
- E3 Residential mortgage credit: Outstanding balances of major private institutional lenders

F. Financial markets S 82

- F1 Selected Canadian and international interest rates, including bond yields and interest arbitrage
- F2 Money market statistics
- F3 Estimated treasury bills and other short-term paper outstanding (excluding Government of Canada)
- F4 Stock market statistics: Canada and United States
- F5 Net new security issues placed in Canada and abroad
- F6 Net new security issues placed in Canada (includes foreign currency issues placed in Canada)
- F7 Net new security issues placed abroad (includes Canadian dollar issues placed in overseas markets)

- D3 Sociétés de prêt hypothécaire liées aux banques à charte : Situation mensuelle (estimations)
- D4 Caisses populaires et credit unions locales : Situation trimestrielle (estimations)
- D5 Banques d'épargne du Québec
- K4* Dépôts dans les caisses d'épargne publiques (Février 1985)
- D6 Sociétés de financement ou de prêt à la consommation : Situation trimestrielle (estimations)
- D7 Sociétés de financement ou de prêt à la consommation : Situation mensuelle (estimations)
- D8 Opérations d'investissement en dollars canadiens de seize compagnies d'assurance-vie
- K5* Compagnies d'assurance-vie : Avoirs détenus au Canada (Octobre 1984)
- D9 Courtiers en valeurs mobilières : Relevé hebdomadaire des stocks de titres
- D10 Sociétés de placement : Situation trimestrielle (estimations)
- D11 Sociétés d'investissement à capital fixe : Situation trimestrielle (estimations)
- D12 Banque fédérale de développement
- K6* Caisses de retraite gérées en fiducie (Décembre 1984)

E. Agrégats financiers S 78

- E1 Indicateurs de l'évolution de la masse monétaire et du crédit
- K7* Agrégats monétaires et mesures du crédit (Février 1985)
- E2 Encours du crédit à la consommation consenti par les principaux prêteurs
- E3 Crédit hypothécaire à l'habitation : Encours des principales catégories d'institutions prêteuses du secteur privé

F. Marchés financiers S 82

- F1 Statistiques diverses sur le loyer de l'argent au Canada et à l'étranger, y compris le taux de rendement des obligations
- F2 Statistiques du marché monétaire
- F3 Estimations de l'encours des bons du Trésor et des autres effets à court terme (non compris les titres du gouvernement canadien)
- F4 Statistiques boursières : Canada et États-Unis
- F5 Émissions nettes de titres placés au Canada et à l'étranger
- F6 Émissions nettes de titres placés au Canada (y compris les titres libellés en monnaies étrangères placés au Canada)
- F7 Émissions nettes de titres placés à l'étranger (y compris les titres libellés en dollars canadiens placés sur les marchés d'outre-mer)

- F8 Gross new bond issues and retirements: Government of Canada and provinces
- F9 Gross new bond issues and retirements: Municipalities
- F10 Gross new issues and retirements: Corporations, other institutions and foreign debtors
- F11 Net new issues of securities by financial and non-financial corporations
- K8* Bonds outstanding: Government of Canada, provincial, municipal, corporate and other bonds (October 1984)
- K9* Net new issues of corporate securities: Industrial classification (March 1985)

G. Government of Canada securities markets S 95

- G1 Government of Canada direct and guaranteed marketable bonds: New issues and retirements
- G2 Government of Canada direct and guaranteed marketable bonds: Details of unmatured outstanding issues
- G3 Government of Canada direct and guaranteed securities and loans: Distribution of holdings
- G4 Government of Canada direct and guaranteed securities and loans: Distribution by type of holder

Special features of a number of issues are as follows:

- (a) Subject to partial redemption at par for the sinking fund on each interest payment date, commencing with 15 April 1965. The earliest call date is 15 October 1977.
- (b) This item represents the cancellation of securities held by purchase funds.
- (c) The earliest call date is 1 June 1978.
- (d) Callable after 15 September 1996.
- (e) On 18 March 1975 the Government of Canada announced that the 3% perpetual bonds will be redeemed at par on 15 September 1996.
- (g) Callable after 1 October 1984.
- (h) Callable after 1 April 1988.
- (i) Callable after 15 October 1988.
- (j) Callable after 20 March 1985.
- (k) Exchangeable on or before 14 December 1984 into an equal par value of 133/4%, 15 March 1990.
- (l) Exchangeable on or before 1 February 1985 into an equal par value of 13%, 1 May 1990.
- (m) Exchangeable on or before 29 June 1984 into an equal par value of 12 1/2%, 1 October 1990.
- (n) Exchangeable on or before 1 November 1985 into an equal par value of 12 1/2%, 1 February 1991.
- (o) Exchangeable on or before 1 May 1984 into an equal par value of 13 3/4%, 1 August 1989.
- (p) Exchangeable on or before 1 November 1984 into an equal par value of 13 1/4%, 1 February 1990.
- (q) Exchangeable on or before 31 January 1986 into an equal par value of 14 1/2%, 1 May 1991.
- (r) Exchangeable on or before 28 February 1986 into an equal par value of 15 1/4%, 1 June 1993.
- (s) Exchangeable on or before 1 April 1986 into an equal par value of 14 3/4%, 1 July 1993.
- (t) Exchangeable on or before 30 June 1986 into an equal par value of 18%, 1 October 1991.
- (u) Exchangeable on or before 31 October 1986 into an equal par value of 15 1/2%, 1 February 1992.
- (v) Exchangeable on or before 1 April 1987 into an equal par value of 15%, 1 July 1992.
- (x) Exchangeable on or before 1 June 1987 into an equal par value of 14 1/4%, 1 September 1992.

Les renvois ci-dessous indiquent les particularités de certaines émissions :

- (a) Emprunt sujet à remboursement partiel par le fonds d'amortissement, au pair, aux dates d'échéance des coupons, à partir du 15 avril 1965; ne peut être remboursé intégralement par anticipation avant le 15 octobre 1977.
- (b) Annulation de titres détenus par le fonds de rachat.
- (c) Ces obligations ne peuvent être remboursées par anticipation avant le 1^{er} juin 1978.
- (d) Remboursables par anticipation après le 15 septembre 1996.
- (e) Le 18 mars 1975, le gouvernement canadien a annoncé que les rentes perpétuelles 3% seront remboursées à leur valeur nominale le 15 septembre 1996.
- (g) Remboursables par anticipation, après le 1^{er} octobre 1984.
- (h) Remboursables par anticipation, après le 1^{er} avril 1988.
- (i) Remboursables par anticipation, après le 15 octobre 1988.
- (j) Remboursables par anticipation, après le 20 mars 1985.
- (k) Échangeables, au plus tard le 14 décembre 1984, contre une valeur nominale égale d'obligation 133/4% échéant le 15 mars 1990.
- (l) Échangeables, au plus tard le 1^{er} février 1985, contre une valeur nominale égale d'obligation 13% échéant le 1^{er} mai 1990.
- (m) Échangeables, au plus tard le 29 juin 1984, contre une valeur nominale égale d'obligation 12 1/2% échéant le 1^{er} octobre 1990.
- (n) Échangeables, au plus tard le 1^{er} novembre 1985, contre une valeur nominale égale d'obligation 12 1/2% échéant le 1^{er} février 1991.
- (o) Échangeables, au plus tard le 1^{er} mai 1984, contre une valeur nominale égale d'obligation 13 3/4% échéant le 1^{er} août 1989.
- (p) Échangeables, au plus tard le 1^{er} novembre 1984, contre une valeur nominale égale d'obligation 13 1/4% échéant le 1^{er} février 1990.
- (q) Échangeables, au plus tard le 31 janvier 1986, contre une valeur nominale égale d'obligation 14 1/2% échéant le 1^{er} mai 1991.
- (r) Échangeables, au plus tard le 28 février 1986, contre une valeur nominale égale d'obligation 15 1/4% échéant le 1^{er} juin 1993.
- (s) Échangeables, au plus tard le 1^{er} avril 1986, contre une valeur nominale égale d'obligation 14 3/4% échéant le 1^{er} juillet 1993.
- (t) Échangeables, au plus tard le 30 juin 1986, contre une valeur nominale égale d'obligation 18% échéant le 1^{er} octobre 1991.
- (u) Échangeables, au plus tard le 31 octobre 1986, contre une valeur nominale égale d'obligation 15 1/2% échéant le 1^{er} février 1992.
- (v) Échangeables, au plus tard le 1^{er} avril 1987, contre une valeur nominale égale d'obligation 15% échéant le 1^{er} juillet 1992.
- (x) Échangeables, au plus tard le 1^{er} juin 1987, contre une valeur nominale égale d'obligation 14 1/4% échéant le 1^{er} septembre 1992.

*Users of these measures of capacity utilization are advised to refer to the discussion of them in the May 1980 issue of this Review "Measuring Capacity Utilization: A Technical Note". Particular attention should be paid to the discussion of how the data are to be evaluated and interpreted.

*Les utilisateurs des données des taux d'utilisation des capacités sont invités à se référer à l'étude qui a été publiée sur ce sujet dans la Revue de mai 1980 sous le titre : « Les méthodes d'estimation des taux d'utilisation des capacités ». Il convient d'accorder une attention particulière à l'analyse de la façon dont il faut évaluer et interpréter ces données.

Notes to the tables

Symbols used in charts and tables

| | |
|---|-------------------|
| A | arithmetic scale |
| L | logarithmic scale |
| E | estimated |
| P | preliminary |
| R | revised |
| N | not available |
| C | corrected |

Owing to the rounding of figures, components may not always add to the totals shown. A horizontal rule in the body of the table indicates either a break in the series or that the earlier figures are available only at a more aggregated level.

Cansim—Databank identification numbers

Many of the time series published in the Review are available from Statistics Canada in machine-readable form, for use on computers, or in print-outs. Each time series of annual, quarterly, monthly or weekly data on the Cansim system (Canadian Socio-Economic Information Management) has an identification number. Series maintained by Statistics Canada have D or L prefixes (e.g. D1432), those maintained by the Bank of Canada have a B prefix (e.g. B318) and those maintained by Canada Mortgage and Housing Corporation have a H prefix (e.g. H48). The identification number is given as a reference at the top of each column of data and refers to the series of weekly, monthly or quarterly data in that column. Where the frequency of a series as it is available on Cansim is different from that shown in the table or where a combination of quarterly and monthly data is shown in the table, the frequency of the Cansim series is indicated by a superscript M if monthly or by a superscript Q if quarterly. Current and revised data are entered into Cansim immediately on release.

Weekly series

The tables in the Review do not cover a full year of weekly data. For all Wednesday series, in the event a holiday falls on a Wednesday, data for the preceding business day will be shown. Figures for weekly series for which the Bank of Canada is the source are available on request to the Department of Monetary and Financial Analysis, Bank of Canada, Ottawa K1A 0G9.

Notes to the tables

The reference notes to the statistical tables in the Review, which prior to 1981 were included in each monthly issue, are now printed under a separate cover. The separate section of notes will be updated and reprinted at approximately yearly intervals. Additional copies of the explanatory notes may be obtained by writing to the Bank of Canada Review, Public Information Division, Secretary's Department, Bank of Canada, Ottawa K1A 0G9.

This section of the monthly Review will include only revisions to the notes as may be required to keep them current for users of the statistical tables, as well as the reference notes pertaining to tables that are published only occasionally in the Review.

Notes relatives aux tableaux

Abréviations utilisées dans les graphiques et les tableaux

| | |
|---|--------------------------|
| A | Échelle arithmétique |
| L | Ordonnées logarithmiques |
| E | Estimations |
| P | Chiffres provisoires |
| R | Chiffres révisés |
| N | Chiffres non disponibles |
| C | Chiffres corrigés |

Du fait que les chiffres sont arrondis, l'addition des éléments d'un tableau ne correspond pas toujours exactement au total indiqué. Une ligne horizontale dans le corps d'un tableau indique soit qu'il y a une rupture dans une série, soit que les données des périodes antérieures ne sont disponibles que sous une forme plus

aggrégée.

Cansim — Numéros de référence des séries de Databank

Nombre des séries chronologiques publiées dans la Revue peuvent être obtenues de Statistique Canada sous une forme directement exploitable par ordinateur ou sous la forme d'imprimés. Elles font partie intégrante du fichier Cansim¹, dont chaque série chronologique — annuelle, trimestrielle, mensuelle ou hebdomadaire — est identifiée par un numéro de référence. Les numéros des séries élaborées par Statistique Canada sont précédés de la lettre «D» ou «L» (par exemple : D1432), ceux des séries de la Banque du Canada, de la lettre «B» (par exemple : B318), et ceux de la Société canadienne d'hypothèques et de logement, de la lettre «H» (par exemple : H48). Dans nos tableaux, le numéro apparaît en tête de la colonne et identifie la série hebdomadaire, mensuelle ou trimestrielle qui figure dans la colonne; dans les cas où les fréquences de données figurant au fichier Cansim et dans un tableau de la Revue diffèrent ou lorsque le tableau comporte à la fois une série mensuelle et une série trimestrielle, la fréquence de la série Cansim est indiquée par la lettre «M» si la série est mensuelle et par la lettre «Q» si elle est trimestrielle.

¹ Ce sigle est une abréviation de *Canadian Socio-Economic Information Management System* — Système canadien de traitement des données socio-économiques.

Séries hebdomadaires

Dans les tableaux de la Revue, les séries de données hebdomadaires ne couvrent pas une année entière. Lorsque le mercredi est un jour férié, les statistiques du mercredi sont établies à partir des données du jour ouvrable précédent. On pourra obtenir les données provenant de la Banque du Canada en s'adressant au département des Études monétaires et financières, Banque du Canada, Ottawa K1A 0G9.

Notes relatives aux tableaux

Les notes relatives aux tableaux de la Revue, qui jusqu'à la fin de 1981 étaient reproduites dans chaque livraison, sont désormais imprimées séparément. Les éditions ultérieures seront mises à jour et publiées environ une fois par année. Ceux qui désirent recevoir d'autres exemplaires des notes sont priés de s'adresser à la Revue de la Banque du Canada, Section de l'information, Secrétariat, Banque du Canada, Ottawa K1A 0G9.

La présente section de la Revue ne contiendra que les mises à jour essentielles à l'interprétation des statistiques et les notes se rapportant aux tableaux publiés à des fréquences variables dans la Revue.

D2—D3

Source: Bank of Canada, Statistics Canada

Data on Table D2 are derived from total trust and mortgage loan company data collected quarterly by Statistics Canada (available in "Financial Institutions", Catalogue 61-006) and from a monthly survey by the Bank of Canada covering companies that at the end of 1984 represented over 80 per cent of total assets in these industries. For months between quarter-ends, items on Table D2 are estimated individually from this survey to arrive at representative industry-wide figures. As a result, total assets and liabilities for the intra-quarter months may not be equal as they are the sums of the component series. Where there are foreign currency assets or liabilities these are included in the relevant component series. Data for the chartered bank mortgage loan subsidiaries appearing on Table D3 originate directly from the monthly survey by the Bank of Canada.

- *Cash and demand deposits* include deposits placed in chartered banks and other financial institutions in Canada and outside Canada.
- *Other term and notice deposits* include swapped deposits at chartered banks and deposits in institutions other than chartered banks.
- *Short-term paper and bankers' acceptances* are bonds, debentures and notes with an original term to maturity of one year or more.
- *Personal loans* comprise both secured and unsecured loans.
- *Collateral business loans* include secured loans placed with investment dealers as well as other collateral loans, and include farm loans.
- *Other assets* comprise other investments in Canada as well as investments in institutions and corporations outside Canada, accounts receivable and accrued revenue, fixed assets, real estate and other assets.
- *Total major assets* include cash and demand deposits, treasury bills, term and notice deposits, short-term paper and collateral loans placed with investment dealers plus Canadian bonds, mortgage loans and sales agreements, personal loans, and Canadian preferred and common shares. Prior to January 1984 foreign securities were also included; after that date, these securities are included in other assets.

Daily interest deposits include only those deposits held by companies surveyed by the Bank of Canada.

- *Tax-exempt deposits* include RRSFs, RHOSFs and other tax-sheltered funds placed in savings or term deposits.
- *Other promissory notes* include promissory notes with an original term to maturity of one year or more, subordinated notes and other notes.

- *Total major liabilities* comprise total deposits, bank loans, debentures issued under trust indentures, and promissory notes.
- *Other liabilities* are debt owing to parent, subsidiary and affiliated companies, accounts payable and accrued liabilities, corporation income taxes payable, deferred income, mortgages payable, deferred income taxes and other liabilities.

H12

Source: Statistics Canada

Data are obtained from the Statistics Canada publication "The Consumer Price Index", Catalogue 62-001. Beginning in January 1985 the weights used in constructing the index are based on 1982 consumer expenditure patterns, replacing the 1978 weights used from April 1982. Two earlier reweightings occurred in October 1978 incorporating 1974 consumer expenditure patterns and May 1973 using 1967 weights. In February 1983, with the release of the January 1983 consumer price index, the time base was changed in a purely arithmetic operation from 1971 to 1981=100. Further information on these revisions, as well as on the concepts and methodology, may be obtained from Statistics Canada publications. Effective with the release of the January 1985 numbers Statistics Canada revised the definition of the shelter component to include both goods and services. A consistent historical series was provided back to September 1978.

The percentage changes shown in Column 15 of Table A1 are the rates published by Statistics Canada in Catalogue 62-001.

D2 et D3

Source : Banque du Canada, Statistique Canada

Les données qui figurent au tableau D2 sont tirées des données de l'ensemble du secteur des sociétés de fiducie ou de prêt hypothécaire, recueillies tous les trimestres par Statistique Canada (publiées dans «Institutions financières», no de catalogue 61-006) et d'une enquête mensuelle menée par la Banque du Canada auprès d'un échantillon de sociétés de fiducie ou de prêt hypothécaire qui représente plus de 80 % de l'actif de ce secteur. Pour ce qui est des mois qui ne coïncident pas avec une fin de trimestre, les chiffres des postes figurant au tableau D2 sont obtenus par estimation cas par cas à partir des données de l'enquête mensuelle, pour en arriver à des chiffres représentatifs du secteur. En conséquence, l'ensemble de l'actif pour les mois qui ne coïncident pas avec une fin de trimestre peut ne pas être égal à l'ensemble du passif correspondant, puisque chacun de ces totaux résulte de l'addition des chiffres de chacun des éléments de la série visée. Les avoirs et engagements en monnaies étrangères sont inclus le cas échéant dans chacune des séries correspondantes. Les données qui figurent au tableau D3 sur les filiales hypothécaires des banques à charte sont tirées directement de l'enquête mensuelle de la Banque du Canada.

- *L'encaisse et les dépôts à vue* comprennent les dépôts confiés aux banques à charte et aux autres institutions financières au Canada et à l'étranger.
- *Les autres dépôts à terme ou à préavis* comprennent les dépôts swaps dans les banques à charte et les dépôts dans les institutions autres que les banques à charte.
- *Le poste Papier à court terme et acceptations bancaires* comprend les obligations, les débetures et les billets, à échéance d'un an ou plus.
- *Les prêts personnels* comprennent les prêts garantis ou non garantis.
- *Les prêts sur nantissement commerciaux* comprennent les prêts garantis accordés aux courtiers en valeurs mobilières de même que les autres prêts sur nantissement; ils comprennent également les prêts agricoles.
- *Les autres éléments de l'actif* comprennent les autres placements au Canada et les placements dans les institutions et les sociétés constituées à l'étranger, les comptes-clients, les produits constatés par régularisation, les immobilisations, les immeubles ou biens réels et autres avoirs.
- *Le poste Ensemble des principaux avoirs* comprend l'encaisse et les dépôts à vue, les bons du Trésor, les dépôts à terme ou à préavis, le papier à court terme et les prêts sur nantissement accordés aux courtiers en valeurs mobilières, ainsi que les obligations canadiennes, les prêts hypothécaires et les contrats de vente, les prêts personnels et les actions canadiennes privilégiées ou ordinaires. Avant le mois de janvier 1984, ce poste comprenait les titres étrangers. Depuis cette date, les titres étrangers figurent dans la rubrique «Autres éléments de l'actif».

- *Le poste Dépôts à intérêt quotidien* ne comprend que les dépôts détenus par les sociétés comprises dans l'enquête de la Banque du Canada.
- *Les dépôts exempts d'impôts* comprennent les REER, les REEL et les autres fonds non imposables placés sous forme de dépôts d'épargne, de dépôts à vue ou de dépôts à terme.
- *Les autres billets à ordre* comprennent les billets à ordre à échéance d'un an ou plus, les billets subordonnés et autres billets.
- *L'ensemble des principaux engagements* comprend l'ensemble des dépôts, des prêts bancaires, des débetures émises en vertu de contrats de fiducie et des billets à ordre.
- *Les autres éléments du passif* comprennent les sommes dues aux sociétés mères, aux filiales et aux sociétés affiliées, les comptes-fournisseurs et les charges à payer, les impôts à payer sur le revenu des sociétés, les revenus différés, les emprunts hypothécaires, les impôts sur le revenu différés et les autres engagements.

H12

Source : Statistique Canada

Les données proviennent de la publication de Statistique Canada intitulée «L'indice des prix à la consommation» (n° 62-001 au catalogue). À compter de janvier 1985, les pondérations qui servent au calcul de l'indice sont fondées sur la structure des dépenses de 1982 et remplacent les pondérations de 1978, qui sont utilisées depuis avril 1982. Les pondérations avaient été révisées à deux reprises auparavant, soit en octobre 1978 pour tenir compte de la structure des dépenses de 1974, et en mai 1973 pour tenir compte de la structure des dépenses de 1967. En février 1983, après publication des données de l'indice des prix à la consommation pour janvier 1983, l'ancienne année de base, soit 1971, a été remplacée par 1981; les opérations effectuées ont été purement arithmétiques. On trouvera dans les publications de Statistique Canada de plus amples renseignements sur ces révisions ainsi que sur les concepts et la méthodologie utilisés. La publication des données de janvier 1985 a coïncidé avec la révision par Statistique Canada de la définition du logement: la nouvelle définition de cette composante englobe à la fois des biens et des services. La série chronologique utilisant cette définition remonte à septembre 1978.

Les taux de variation reproduits à la colonne 15 du Tableau A1 sont extraits de la publication n° 62-001 de Statistique Canada.
